A Workbook For Arguments Second Edition A Complete Course In Critical Thinking:

A Workbook for Arguments David R. Morrow, Anthony Weston, 2016 Also contains the entire text of the fourth edition of the Weston's Rulebook while supplementing this core text with extensive further explanations and exercises

A Workbook for Arguments David R. Morrow, Anthony Weston, 2019-11-18 David Morrow and Anthony Weston build on Weston's acclaimed A Rulebook for Arguments to offer a complete textbook for a course in critical thinking or informal logic. Features of the book include Homework exercises adapted from a wide range of actual arguments from newspapers, philosophical texts, literature, movies, YouTube videos, and other sources. Practical advice to help students succeed when applying the Rulebook's rules. Suggestions for further practice that outline activities students can do by themselves or with classmates to improve their critical thinking skills. Detailed instructions for in-class activities and take-home assignments designed to engage students in critical thinking. An appendix on mapping arguments, a topic not included in the Rulebook that introduces students to this vital skill in evaluating or constructing complex and multi-step arguments. Model responses to odd-numbered exercises including commentaries on the strengths and weaknesses of selected model responses as well as further discussion of some of the substantive intellectual, philosophical, and ethical issues raised by the exercises. The third edition of Workbook contains the entire text of the recent fifth edition of the Rulebook, supplementing this core text with extensive further explanations and exercises. Updated and improved homework exercises ensure that the examples continue to resonate with today's students. Roughly one-third of the exercises have been replaced with updated or improved examples. A new chapter on engaging constructively in public debates, including five new sets of exercises, trains students to engage respectfully and constructively on controversial topics, an increasingly important skill in our hyper-partisan age. Three new critical thinking activities offer further opportunities to practice constructive dialogue.

A 21st Century Ethical Toolbox Anthony Weston, 2018 A 21st Century Ethical Toolbox invites students to think beyond the rigid pro and con positions of tough ethical problems by developing creative problem-solving skills, moral vision, and genuine dialogue. Provocative selections from a wide range of philosophers, essayists, community activists, and students are interwoven with Weston's own discussions to equip students with the tools they need to think critically about contentious issues.

Innovating Luis Perez-Breva, 2017-02-17 Discover the MIT-developed doer's approach to innovation with this guide that reveals you don't need an earth-shattering idea to create a standout product, service, or business; just a hunch that you can scale up to impact. Innovation is the subject of countless books and courses, but there's very little out there about how you actually innovate. Innovation and entrepreneurship are not one and the same, although aspiring innovators often think of them that way. They are told to get an idea and a team and to build a show and tell for potential investors. In *Innovating*, Luis Perez Breva describes another approach, a doer's approach developed over a decade at MIT and internationally in workshops, classes, and companies. He shows that innovating doesn't require an earth-shattering idea; all it takes is a hunch. Anyone can do it. By

prototyping a problem and learning by being wrong innovating can be scaled up to make an impact As Perez Brea demonstrates nothing is new at the outset of what we only later celebrate as innovation In *Innovating the process* illustrated by unique and dynamic artwork is shown to be empirical experimental nonlinear and incremental You give your hunch the structure of a problem Anything can be a part Your innovating accrues other people s knowledge and skills Perez Brea describes how to create a kit for innovating and outlines questions that will help you think in new ways Finally he shows how to systematize what you ve learned to advocate communicate scale up manage innovating continuously and document you need a notebook to converse with yourself he advises Everyone interested in innovating also needs to read this book
