A Taste of Progress Nelleke Teughels, Peter Scholliers, 2016-03-09 World exhibitions have been widely acknowledged as important sources for understanding the development of the modern consumer and urbanized society, yet whilst the function and purpose of architecture at these major events has been well studied, the place of food has received very little attention. Food played a crucial part in the lived experience of the exhibitions for visitors who could acquaint themselves with the latest food innovations, exotic cuisines, and traditional dishes; for officials attending lavish banquets for the manufacturers who displayed their new culinary products; and for scientists who met to discuss the latest technologies in food hygiene. Food stood as a powerful semiotic device for communicating and maintaining conceptions of identity, history, traditions, and progress of inclusion and exclusion, making it a valuable tool for researching the construction of national or corporate sentiments. Combining recent developments in food studies and the history of major international exhibitions, this volume provides a refreshing alternative view of these international and intercultural spectacles.

Eating Disorders in Boys and Men Jason M. Nagata, Tiffany A. Brown, Stuart B. Murray, Jason M. Lavender, 2021-04-12 Boys and men with eating disorders remain a population that is under-recognized and underserved within both research and clinical contexts. It has been well documented that boys and men with eating disorders often exhibit distinct clinical presentations with regard to core cognitive (e.g., body image) and behavioral (e.g., pathological exercise) symptoms. Such differences, along with the greater likelihood of muscularity-oriented disordered eating among boys and men, emphasize the importance of understanding and recognizing unique factors of clinical relevance within this population. This book reviews the most up-to-date research findings on eating disorders among boys and men, with an emphasis on clinically salient information across multiple domains. Five sections are included: the first focused on a historical overview and the unique nature and prevalence of specific forms of eating disorder symptoms and body image concerns in boys and men; the second section details population-specific considerations for the diagnosis and assessment of eating disorders, body image concerns, and muscle dysmorphia in boys and men; the third section identifies unique concerns regarding medical complications and care in this population, including medical complications of appearance and performance-enhancing substances; the fourth section reviews current findings and considerations for eating disorder prevention and intervention for boys and men; the fifth section of the book focuses on specific populations (e.g., sexual minorities, gender minorities) and addresses sociocultural factors of particular relevance for eating disorders in boys and men (e.g., racial and ethnic considerations, cross-cultural considerations). The book then concludes with a concise overview of key takeaways and a focused summary of current evidence gaps and unanswered questions, as well as directions for future

Food and the Self Isabelle de Solier,2013-10-10 We often hear that selves are no longer formed through producing material things at work but by consuming them in leisure leading to meaningless modern lives This important book reveals the cultural shift to be more complex demonstrating how people in postindustrial societies strive to form meaningful and moral selves through both the consumption and production of material culture in leisure Focusing on the material culture of food the book explores these theoretical questions through an ethnography of those individuals for whom food is central to their self foodies It examines what foodies do and why they do it through an in depth study of their lived experiences The book uncovers how food offers a means of shaping the self not as a consumer but as an amateur who engages in both the production and consumption of material culture and adopts a professional approach which reveals the new moralities of productive leisure in self formation The chapters examine a variety of practices from fine dining and shopping to cooking and blogging and include rare data on how people use media such as cookbooks food television and digital food media in their everyday life This book is ideal for students scholars and anyone interested in the meaning of food in modern life

Retail Food Safety Jeffrey Farber,Jackie Crichton,O. Peter Snyder, Jr.,2014-10-07 Currently there is no one book or textbook that covers all aspects of retail food safety It is becoming apparent that a number of issues relating to retail food safety have come to the forefront in some jurisdictions of late For example a recent USDA risk assessment has pointed out that issues occurring at USA retail appear to be critical in terms of contamination of deli meat As well a large listeriosis outbreak in Quebec pointed to retail cross contamination as a key issue In terms of sanitation a number of advances have been made but these have not all been synthesized together in one chapter with a focus on retail In addition the whole area of private standards and the Global Food Safety Initiative GFSI have come to the forefront of late and these as well will be explored in great detail Other aspects related to the safety of important food
