

Unit 2 - Rational Functions

Applications of Rational Functions

Overall Expectations:

- ☐ **POV.03** Solve problems involving polynomial and simple rational equations graphically and algebraically.

Specific Expectations:

- ☐ **PO3.05** Determine, through investigation using technology the connection between the real roots of a rational equation and the x-intercepts of the graph of the corresponding rational function, and describe this connection;
- ☐ **PO3.06** Solve simple rational equations in one variable algebraically, and verify solutions using technology;
- ☐ **PO3.07** Solve problems involving applications of polynomial and simple rational functions and equations.

Solving Rational Equations

How does this relate to concepts from the past?

- ☐ Solving a rational equation graphically is very similar to graphing a rational function and finding its x-intercept(s).
- ☐ Solving a rational equation algebraically is also similar in some ways to solving equations with fractions that you learned in Grade 9.

Solving an Equation Graphically

The real roots of a rational equation are the x-intercepts of the graph of the corresponding rational function.

Example

Solve $\frac{x-2}{x-3} = 0$

Olver, 2013-11-08 This textbook is designed for a one year course covering the fundamentals of partial differential equations geared towards advanced undergraduates and beginning graduate students in mathematics science engineering and elsewhere The exposition carefully balances solution techniques mathematical rigor and significant applications all illustrated by numerous examples Extensive exercise sets appear at the end of almost every subsection and include straightforward computational problems to develop and reinforce new techniques and results details on theoretical developments and proofs challenging projects both computational and conceptual and supplementary material that motivates the student to delve further into the subject No previous experience with the subject of partial differential equations or Fourier theory is assumed the main prerequisites being undergraduate calculus both one and multi variable ordinary differential equations and basic linear algebra While the classical topics of separation of variables Fourier analysis boundary value problems Green's functions and special functions continue to form the core of an introductory course the inclusion of nonlinear equations shock wave dynamics symmetry and similarity the Maximum Principle financial models dispersion and solutions Huygens Principle quantum mechanical systems and more make this text well attuned to recent developments and trends in this active field of contemporary research Numerical approximation schemes are an important component of any introductory course and the text covers the two most basic approaches finite differences and finite elements *Elliptic Curves and Their Applications to Cryptography* Andreas Enge, 2012-12-06 Since their invention in the late seventies public key cryptosystems have become an indispensable asset in establishing private and secure electronic communication and this need given the tremendous growth of the Internet is likely to continue growing Elliptic curve cryptosystems represent the state of the art for such systems Elliptic Curves and Their Applications to Cryptography An Introduction provides a comprehensive and self contained introduction to elliptic curves and how they are employed to secure public key cryptosystems Even though the elegant mathematical theory underlying cryptosystems is considerably more involved than for other systems this text requires the reader to have only an elementary knowledge of basic algebra The text nevertheless leads to problems at the forefront of current research featuring chapters on point counting algorithms and security issues The Adopted unifying approach treats with equal care elliptic curves over fields of even characteristic which are especially suited for hardware implementations and curves over fields of odd characteristic which have traditionally received more attention Elliptic Curves and Their Applications An Introduction has been used successfully for teaching advanced

undergraduate courses It will be of greatest interest to mathematicians computer scientists and engineers who are curious about elliptic curve cryptography in practice without losing the beauty of the underlying mathematics Pre-Calculus Workbook For Dummies Yang Kuang,Michelle Rose Gilman,2011-03-16 Get the confidence and math skills you need to get started with calculus Are you preparing for calculus This hands on workbook helps you master basic pre calculus concepts and practice the types of problems you ll encounter in the course You ll get hundreds of valuable exercises problem solving shortcuts plenty of workspace and step by step solutions to every problem You ll also memorize the most frequently used equations see how to avoid common mistakes understand tricky trig proofs and much more Pre Calculus Workbook For Dummies is the perfect tool for anyone who wants or needs more review before jumping into a calculus class You ll get guidance and practical exercises designed to help you acquire the skills needed to excel in pre calculus and conquer the next contender calculus Serves as a course guide to help you master pre calculus concepts Covers the inside scoop on quadratic equations graphing functions polynomials and more Covers the types of problems you ll encounter in your coursework With the help of Pre Calculus Workbook For Dummies you ll learn how to solve a range of mathematical problems as well as sharpen your skills and improve your performance El-Hi Textbooks in Print ,1980 **An Advanced Complex Analysis Problem Book** Daniel Alpay,2015-11-13 This is an exercises book at the beginning graduate level whose aim is to illustrate some of the connections between functional analysis and the theory of functions of one variable A key role is played by the notions of positive definite kernel and of reproducing kernel Hilbert space A number of facts from functional analysis and topological vector spaces are surveyed Then various Hilbert spaces of analytic functions are studied Partial Differential Equations Mr. Rohit Manglik,2024-07-23 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels *A Five-Year Study of the First Edition of the Core-Plus Mathematics Curriculum* Harold Schoen,Steven W. Ziebarth,Christian R. Hirsch,Allison BrckaLorenz,2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each

of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at www.wmich.edu/cmpmp for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century The American Mathematical Monthly, 1974 Includes articles as well as notes and other features about mathematics and the profession

Cuyt, 2012-12-06 These are the proceedings of the international conference on Nonlinear numerical methods and Rational approximation II organised by Annie Cuyt at the University of Antwerp Belgium 05 11 September 1993 It was held for the third time in Antwerp at the conference center of UIA after successful meetings in 1979 and 1987 and an almost yearly tradition since the early 70 s The following figures illustrate the growing number of participants and their geographical dissemination In 1993 the Belgian scientific committee consisted of A Bultheel Leuven A Cuyt Antwerp J Meinguet Louvain la Neuve and J P Thiran Namur The conference focused on the use of rational functions in different fields of Numerical Analysis The invited speakers discussed Orthogonal polynomials D S Lubinsky Rational interpolation M Gutknecht Rational approximation E B Saff Padé approximation A Gonchar and Continued fractions W B Jones In contributed talks multivariate and multidimensional problems applications and implementations of each main topic were considered To each of the five main topics a separate conference day was devoted and a separate proceedings chapter compiled accordingly In this way the proceedings reflect the organisation of the talks at the conference Nonlinear numerical methods and rational approximation may be a narrow field for the outside world but it provides a vast playground for the chosen ones It can fascinate specialists from Moscow to South Africa from Boulder in Colorado and from sunny Florida to Zurich in Switzerland Foundations of Free Noncommutative

Function Theory Dmitry S. Kaliuzhnyi-Verbovetskyi, Victor Vinnikov, 2014-11-19 In this book the authors develop a theory of free noncommutative functions in both algebraic and analytic settings Such functions are defined as mappings from square matrices of all sizes over a module in particular a vector space to square matrices over another module which respect the size direct sums and similarities of matrices Examples include but are not limited to noncommutative polynomials power series and rational expressions Motivation and inspiration for using the theory of free noncommutative functions often comes from free probability An important application area is dimensionless matrix inequalities these arise e g in various optimization problems of system engineering Among other related areas are those of polynomial identities in rings formal languages and finite automata quasideterminants noncommutative symmetric functions operator spaces and operator algebras and quantum control *VCE Specialist Mathematics* Roger Dedman, 2005-11-04 **Applying Formal Methods: Testing, Performance, and M/E-Commerce** Manuel Núñez, Zakaaria Maamar, Fernando Pelayo, Key Pousttchi, Fernando Rubio, 2004-09-09 This book constitutes the joint refereed proceedings of the First International Workshop on Theory Building and Formal Methods in Electronic Mobile Commerce TheFormEMC the first European Performance Engineering Workshop EPEW and the First International Workshop on Integration of Testing Methodologies ITM held jointly in association with FORTE 2004 in Toledo Spain in October 2004 The 27 revised full papers presented were carefully reviewed and selected from a total of 62 submissions The papers are grouped in three topical sections corresponding to the workshop topics **TI-89 Graphing Calculator For Dummies** C. increasingly sophisticated use of linear algebra on both theoretical and algorithmic fronts This volume gives particular emphasis to exposing broader contexts of the signal processing problems so that the impact of algorithms and hardware can be better understood it brings together the writings of signal processing engineers computer engineers and applied linear algebraists in an exchange of problems theories and techniques This volume will be of interest to both applied mathematicians and engineers *Publications* United States.
