Research on Teaching Strategies and Skills in Different Educational Stages Pedro Gil-Madrona, Linda Saraiva, Luisa Losada-Puente, 2025-03-19 The teaching practice becomes a reciprocal activity in the classroom when teachers apply their creativity and their knowledge resulting from research and scientific evidence in the didactic teaching process with the purpose of strengthening in the students the key competencies of their training turning students at the core of the didactic process Teaching strategies must be articulated from previous research and planning and designed sequentially to promote real and interesting learning scenarios and thereby achieve significant learning From this perspective of teaching learning strategies the reciprocal interaction between the student and

the teacher becomes the focus of attention with a playful motivating interesting and rewarding approach for the learner The role of the teacher is conceived as fundamental in the teaching process to achieve the link between teaching learning and evaluation strategies For this reason multidisciplinary studies are welcome from all stages of the educational system with quantitative qualitative and mixed approaches and reviews promoting good teaching practices of reflection and innovation from these studies

Audrey Amrein-Beardsley, 2014-04-24 Since passage of the No Child Left Behind Act in 2001 academic researchers econometricians and statisticians have been exploring various analytical methods of documenting students academic progress over time Known as value added models VAMs these methods are meant to measure the value a teacher or school adds to student learning from one year to the next To date however there is very little evidence to support the trustworthiness of these models What is becoming increasingly evident yet often ignored mainly by policymakers is that VAMs are 1 unreliable 2 invalid 3 nontransparent 4 unfair 5 fraught with measurement errors and 6 being inappropriately used to make consequential decisions regarding such things as teacher pay retention and termination Unfortunately their unintended consequences are not fully recognized at this point either Given such the timeliness of this well researched and thoughtful book cannot be overstated This book sheds important light on the debate surrounding VAMs and thereby offers states and practitioners a highly important resource from which they can move forward in more research based ways
