Marcum, 2012-01-03 Although modern medicine enjoys unprecedented success in providing excellent technical care many patients are dissatisfied with the poor quality of care or the unprofessional manner in which physicians sometimes deliver it Recently this patient dissatisfaction has led to quality of care and professionalism crises in medicine In this book the author proposes a notion of virtuous physician to address these crises He discusses the nature of the two crises and efforts by the medical profession to resolve them and then he briefly introduces the notion of virtuous physician and outlines its basic features Further virtue theory is discussed along with virtue ethics and virtue epistemology and specific virtues especially as they relate to medicine The author also explores the ontological priority of caring as the metaphysical virtue for grounding the notion of virtuous physician and two essential ontic virtues care and competence In addition to this he examines the transformation of competence into prudent wisdom and care into personal radical love to forge the compound virtue of prudent love which is sufficient for defining the virtuous physician Lastly two clinical case stories are reconstructed which illustrate the various virtues associated with medical practice and it is discussed how the notion of virtuous physician addresses the quality of care and professionalism crises **Living L'Arche** Kevin Scott Reimer, 2009-01-01 Explores the origins and characteristics of compassionate love in those who care for the disabled Cultural Typologies of Love Victor Karandashev, 2022-09-01 This

Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult **International Journal of Indian Psychology, Volume 6, Issue 1, (No. 2)**

IJIP.IN,2018-07-23 **Saving America?** Robert Wuthnow,2009-11-06 On January 29 2001 President George W Bush signed an executive order creating the White House Office of Faith Based and Community Initiatives This action marked a key step toward institutionalizing an idea that emerged in the mid 1990s under the Clinton administration the transfer of some social programs from government control to religious organizations However despite an increasingly vocal ideologically charged national debate a debate centered on such questions as What are these organizations doing How well are they doing it Should they be supported with tax dollars solid answers have been few In *Saving America* Robert Wuthnow provides a wealth of up to date information whose absence until now has hindered the pursuit of answers Assembling and analyzing new evidence from research he and others have conducted he reveals what social support faith based agencies are capable of providing Among the many questions he addresses Are congregations effective vehicles for providing broad based social programs or are they best at supporting their own members How many local congregations have formal programs to assist needy families How much money do such programs represent How many specialized faith based service agencies are there and which are most effective Are religious organizations promoting trust love and compassion The answers that emerge demonstrate that American religion is helping needy families and that it is more broadly fostering civil society Yet religion alone cannot save America from the broad problems it faces in providing social services to those who need them most Elegantly written *Saving America* represents an authoritative and evenhanded benchmark of information for the current and the coming debate

Faith seeking understanding Nico Vorster, Frederik van Niekerk, 2023-03-01 How did it all begin How do we even start to engage the differences between creation narratives in the Christian Bible and modern scientific theory The authors of this book explore hermeneutic approaches and developments in biblical studies to set the scene for a religious approach This approach is open to the possibility that a literalist approach to Scripture is in fact the most unjustifiable reading of the Bible This may profoundly affect how we view God the cosmos and even ourselves To be able to read the Bible from the perspective of an open present and future paves the way for suppressed uncertainties to be liberated This paves the way for humankind to freely question all things without being enslaved by imposed religious dogma This is not to say that religion has served its purpose but it is far from it With the rise of technological advancements come other social and anthropological problems not to mention the challenge we face on a global scale with climate change et cetera Just as we dare to peek over the edge of a future without religion the authors bring us back to the fundamental teachings of faith traditions Christianity in particular They remind us that the solutions to these challenges are to be found in us becoming better humans Becoming better humans brings us back into the arena of faith traditions When technology may lead to social disconnection and narcissism religion calls for love of self and neighbour Where greed inspired advancements threaten the future of our planet religion teaches us to be in relationship with our environment and to be custodians of it

Love and Organization Michael Pirson, 2022-06-30 Organizations are not human but they are made up of people Examining the organization functioning growing and developing and moving together as one unit the well being and success of that organization depends on the well being of people that make it up Love in its various forms is the energy that motivates and fuels creativity care innovation progress and well being Traditionally organizational structures have been set up to support compliance and command and control which often discourages love and creates policies against love at the workplace The result has been reduced growth productivity and retention of businesses as well as reduced well being for employees This reduced connectivity between individuals has also at a higher level adversely affected society Without love people are working and performing with reduced energy and at reduced capacity While prior research has been focused on love at the workplace from the viewpoint of psychologists this book explores the impact of love within

organizational contexts from various viewpoints including management psychology and philosophy It explores love in the organizational context by looking at how it affects meaning purpose well being motivation faith care spiritual development and how the identity and well being of each person in the organization positively affects retention and the growth and success of that organization It will be of interest to researchers academics and advanced students in the fields of organizational studies leadership and management
