Cherian,2022-03-28 AIR POLLUTION CLEAN ENERGY AND CLIMATE CHANGE Anthropogenic climate change is a globally recognized threat multiplier Yet decades of intergovernmental negotiations have failed to curb toxic levels of fossil fuel energy related air pollution which the World Health Organization WHO has identified as the world s largest single environmental health risk Lying in plain view are the troubling truths about the morbidity and ill health burdens associated with anthropogenic climate change that are borne by those who have done the least to contribute to per capita emissions of greenhouse gas emissions Ignoring the nexus between air pollution lack of access to clean energy and climate adversities represents a collective failure of the UN s ambitious universally agreed upon 2030 Sustainable Development Agenda SDA which pledged to leave no one behind This book highlights the air pollution crisis that emanates from the heavy reliance on polluting forms of energy and the urbanization of poverty in developing countries It provides a framework for understanding why the broader sustainable development community needs to address the more neglected intersection between adverse climatic impacts and energy related air pollution which devastates the lives of the poorest and most vulnerable amongst us especially young children women and the elderly It focuses on the importance of breaking down persistent global silos and goals on sustainable energy for all and climate change reflected in the UNs 2030 SDA and the 2015 Paris Agreement Integrating clean air and climate mitigation measures that specifically include curbing short lived climate pollutants such as black carbon via innovative partnerships modalities are seen as vital to clean energy and climate responsive action This book argues that linked actions by non nation state actors aimed at reducing air pollution and ameliorating short term climate pollutants in the most populous cities particularly in countries like India where annual average particulate matter pollution levels consistently exceed WHO guidelines are essential in reducing grave health costs and disease burdens Air Pollution
