

Lecture 11 Systems of Equations & Applications

System of Equations

If you have an equation with two variables, the solution is a set of ordered pairs. If you want a single solution you will need a second equation which uses the same two variables.

System of equations – two or more equations with several variables.

Example: $4x + y = 5$

$$3x - 2y = 12$$

Solving a System of Two Linear Equations with Two Variables

A. Graphical Method

Graph both equations on the same grid. The solution is any point that is common to both lines.

Possibilities

- System is unique – the solution is one ordered pair - intersects
- System is inconsistent – there is no solution \times parallel
- System is dependent – the solution is all the points on the line one on top of other

Example: Solve by graphing

$$4x + y = 5$$

$$3x - 2y = 12$$

x	y
0	5
$1\frac{1}{4}$	0
1	1

x	y
0	-6
4	0
1	$-4\frac{1}{2}$

Large-Scale Knowledge Resources. Construction and Application Takenobu Tokunaga, Antonio Ortega, 2008-02-08 At the start of the 21st century we are now well on the way towards a knowledge intensive society in which knowledge plays ever more important roles Thus research interest should inevitably shift from information to knowledge with the problems of building organizing maintaining and utilizing knowledge coming central issues in a wide variety of fields The 21st Century COE program Framework for Systematization and Application of Large scale Knowledge sources COE LKR conducted by the Tokyo Institute of Technology is one of several early attempts worldwide to address these important issues Inspired by this project LKR2008 aimed at bringing together diverse contributions in cognitive science computer science education and linguistics to explore design construction extension maintenance validation and application of knowledge Responding to our call for papers were received 38 submissions from a variety of research areas

Each paper was reviewed by three Program Committee members Since we were aiming at an interdisciplinary conference covering a wide range of topics concerning large scale knowledge resources LKR each paper was assigned a reviewer from a topic area outside the main thrust of the paper This reviewer was asked to assess whether the authors described the motivation and importance of their work in a comprehensible manner even for readers in other research areas Following a rigorous reviewing process we accepted 14 regular papers and 12 poster papers
