Zatzman,2012-12-10 Taking a fresh new look at the energy industry and how the Earth s resources are being developed the aim of this book is to aid engineers and scientists in attaining sustainability in this field both from an economic and environmental perspective The author herein presents engineering research and practice that is focused on achieving energy sustainability from a global perspective as is also outlined in other Scrivener books such as *The Greening of Petroleum Operations* and the author s own recently published book *Sustainable Energy Pricing* the companion volume to this book The author applies the principles of economic sustainability developed there to re examine actual engineering practices in fossil fuel and alternative energy such as wind and tidal power exploration and development One of the book s unique features is its analysis of what is deficient in the thinking and analytical frameworks that inform engineering work done in the field The book addresses the complex

issues surrounding our quest for sustainability and the key causes of the challenges that face the energy industry and its resource development From this standpoint the book challenges the reasoning and conclusions drawn from the often quoted theory of peak oil **High-resolution Seafloor Survey and Applications** Ziyin Wu,Fanlin Yang,Yong Tang,2020-12-07

This book focuses on the survey technology post processing technology mapping technology and scientific application of the submarine topography and geomorphology in detail High resolution submarine geomorphology is a frontier branch of marine geology and marine surveying and mapping which provides a direct basis to study the seabed surface to understand the tectonic movement and submarine evolution In the past two decades high resolution submarine geomorphology with high precision multi beam echo sounding side scan sonar and sub bottom profiler as the major techniques is developing very quickly and is one of the frontiers of international marine science and technology These high techniques promote the traditional submarine geomorphology to high resolution and quantitative research At present high resolution submarine geomorphology is widely used in the delimitation of the continental shelf the international seabed resources survey marine engineering and marine military applications In order to facilitate readers to understand how to acquire and apply scientific research based on submarine topographic data it highlights the combination of theory technology and scientific application This book is useful as a reference for professional and technical personnel in related fields and also as a textbook for both graduate and undergraduate students as well **Irregular Citizenship, Immigration, and Deportation** Peter

Nyers,2018-12-14 Deportation has again taken a prominent place within the immigration policies of nation states Irregular Citizenship Immigration and Deportation addresses the social responses to deportation in particular the growing movements against deportation and detention and for freedom of movement and the regularization of status The book brings deportation and anti deportation together with the aim of understanding the political subjects that emerge in this contested field of governance and control freedom and struggle However rather than focusing on the typical subjects of removal refugees the undocumented and irregular migrants Irregular Citizenship Immigration and Deportation looks at the ways that citizens get caught up in the deportation apparatus and must struggle to remain in or return to their country of citizenship The transformation of regular citizens into deportable irregular citizens involves the removal of the rights duties and obligations of citizenship This includes unmaking citizenship through official revocation or denationalization as well as through informal extra legal and unofficial means The book features stories about struggles over removal and return deportation and repatriation rescue and abandonment The book features eleven acts of citizenship that occur in the context of deportation and anti deportation arguing that these struggles for rights recognition and return are fundamentally struggles over political subjectivity of citizenship This book will be of interest to students and scholars of citizenship migration and security studies
