Enhancement of Industrial Energy Efficiency and Sustainability Andrea Trianni, 2021-09-02 Industrial energy
efficiency has been recognized as a major contributor in the broader set of industrial resources to improved sustainability
and circular economy Nevertheless the uptake of energy efficiency measures and practices is still quite low due to the
existence of several barriers Research has broadly discussed them together with their drivers More recently many
researchers have highlighted the existence of several benefits beyond mere energy savings stemming from the adoption of
such measures for several stakeholders involved in the value chain of energy efficiency solutions Nevertheless a deep
understanding of the relationships between the use of the energy resource and other resources in industry together with the
most important factors for the uptake of such measures also in light of the implications on the industrial operations is still
lacking However such understanding could further stimulate the adoption of solutions for improved industrial energy
