Stefanov, Charles Redman, 2007-12-10

Despite the promising and exciting possibilities presented by new and fast developing remote sensing technologies applied to urban areas there is still a gap perceived between the generally academic and research focused spectrum of results offered by the urban remote sensing community and the application of these data and products by the local governmental bodies of urban cities and regions While there is no end of interesting science questions that we can ask about cities sometimes these questions don't match well with what the operational problems and concerns of a given city are The authors present data from six urban regions from all over the world They explain what the important questions are and how one can use data and scientific skills to help answer them Sustainable Surface Water Management

Susanne M. Charlesworth, Colin A. Booth, 2016-11-14 Sustainable Surface Water Management a handbook for SUDS addresses issues as diverse as flooding water quality amenity and biodiversity but also mitigation of and adaptation to global climate change human health benefits and reduction in energy use Chapters are included to cover issues from around the world but they also address particular designs associated with the implementation of SUDS in tropical areas problems with retrofitting SUDS devices SUDS modelling water harvesting in drought stricken countries using SUDS and the inclusion of SUDS in the climate change strategies of such cities as Tokyo New York and Strasbourg Decision Making with

Uncertainty in Stormwater Pollutant Processes Buddhi Wijesiri, An Liu, Prasanna Egodawatta, James McGree, Ashantha Goonetilleke, 2018-12-06 This book presents new findings on intrinsic variability in pollutant build up and wash off processes by identifying the characteristics of underlying process mechanisms based on the behaviour of various sized particles The correlation between build up and wash off processes is clearly defined using heavy metal pollutants as a case study The outcome of this study is an approach developed to quantitatively assess process uncertainty which makes it possible to mathematically incorporate the characteristics of variability in build up and wash off processes into stormwater quality models In addition the approach can be used to quantify process uncertainty as an integral aspect of stormwater quality predictions using common uncertainty analysis techniques The information produced using enhanced modelling tools will promote more informed decision making and thereby help to improve urban stormwater quality Remote Sensing of Land
