Potenziale und Herausforderungen des Geschäftsprozessmanagements im Enterprise 2.0 unter der Berücksichtigung der Dynamik unternehmerischer Systeme Boris Dombrowski, 2011

Hochkomplexe und volatile Entwicklungen prägen das heutige unternehmerische Umfeld Durch Dynamik begründeten Problemstellungen werden aber nur unzureichend anhand unternehmerischer Systeme und Prozesse reflektiert Zwei Disziplinen das Geschäftsprozessmanagement und das Enterprise 2.0 sind an der Schnittstelle zwischen wirtschaftswissenschaftlichen und technologischen Fragestellungen als interdisziplinäre Konzepte der Wirtschaftsinformatik positioniert Beide Konzepte erscheinen als vielversprechende Mittel zur Leistungssteigerung unternehmerischer Prozesse Vor diesem Hintergrund wird die Frage adressiert welche Potenziale und Herausforderungen sich bei einer Konvergenz der beiden Disziplinen ergeben um eine defizitäre Unterstützung dynamisch induzierter Geschäftsprozesse abzuschwächen oder zu kompensieren Defizite des klassischen Geschäftsprozessmanagements und Potenziale des Geschäftsprozessmanagements im Enterprise 2.0 werden herausgearbeitet und anhand eines praktischen Szenarios reflektiert Die Zusammenführung etablierter regelorientierter Konzepte mit neuen hochflexiblen Mechanismen ist für Unternehmen jedoch mit einem Wandel in organisationalen Denkweisen und Kulturen verbunden Der Autor analysiert die Potenziale und Herausforderungen die sich durch eine Zusammenführung von Geschäftsprozessmanagement und glq Enterprise 2.0 grq für die Unterstützung unternehmerischer Prozesse ergeben Er kombiniert dazu theoretische Erkenntnisse aus der Literatur mit seinen eigenen Praxiserfahrungen im Rahmen seiner Tätigkeit als Projektmanager und Consultant und schafft es so einen wichtigen Beitrag zum jungen Thema glq Enterprise 2.0 grq zu leisten Prof Dr Markus Bick

iBPMS: Intelligent BPM Systems Layna Fischer, 2013-10-14 Intelligent business process management is the next generation of enterprise BPM leveraging recent technological advances to attain a degree of operational responsiveness not possible with yesterday s business process platform Today companies of all types want faster and better insight into their operations This growing demand for operational intelligence has given rise to a new smarter variety of business process management suites BPMSs An intelligent BPM suite provides the functionality needed to support more intelligent business operations including real time analytics extensive complex event processing CEP and business activity monitoring BAM technologies and enhanced mobile social and collaborative capabilities Dubbed iBPMS by Gartner Group

who describes the intelligent BPM Suite as having 10 core components A process orchestration engine A model driven composition environment Content interaction management Human interaction management Connectivity Active analytics sometimes called continuous intelligence On demand analytics Business rules management BRM Management and administration for the suite s technical aspects A process component registry repository An intelligent BPM suite provides the functionality needed to support more intelligent business operations including real time analytics extensive complex event processing CEP and business activity monitoring BAM technologies and enhanced mobile social and collaborative capabilities The co authors of this important book describe various aspects and approaches with regard to impact and opportunity

BPM Everywhere Nathaniel Palmer, Scott Francis, Peter Whibley, Surendra Reddy, Peter Fingar, Dr Setrag Khoshafian, Larry Hawes, Charles Webster, Vinay Mummigatti, Roy Altman, James Taylor, Joseph B. Lail, Keith D. Swenson, Rudiger Pryss, Stuart Chandler, David RR Webber, Mark Casey, Wil van der Aalst, Dr Anne Rozinat, Matthias Walter, Mara Nikolaidou, Alberto Manuel, 2019-10-23 We are entering an entirely new phase of BPM the era of BPM Everywhere or BPME BPME represents the strategy for leveraging not simply surviving but fully exploiting the wave of disruption facing every business over the next 5 years and beyond Without question one of the single most disruptive events in the last decade was the introduction of the smartphone Consider for a moment how great of an impact this has had on the relationship between businesses and their customers Not even the emergence of the Web and Internet based digital native business models can compare with the level of intimacy now available with your customers In the era of the Internet of Things where smart homes appliances cars phones virtually imaginable devices are all connected BPM must and will be everywhere As Peter Whibley discusses in The Internet of Things Will Be Invisible by 2025 there are expected to be more than 26 billion or more connected devices In the chapter Digital Prescriptive Maintenance Disrupting Manufacturing through IoT Big Data and Dynamic Case Management Dr Setrag Khoshafian introduces the 4 Vs of thing data specifically Volume Velocity Variety and Value From monitors and remote sensors to appliances and vehicles to tens of billions of other things connected devices are generating meaningful and informative data that would easily overwhelm any human being but collectively they present critical context about processes and the state of operations Big Data has never been so large nor presented such an acute role within enterprises and the processes that drive them BPME as well as traditional BPM methods can already be found at the center of this Its role will grow exponentially Emergent factors such as process mining see chapter Mining the Swarm by Keith Swenson et al will be critical for uncovering engagement patterns and the need for process management platforms to coordinate interaction and control of smart devices It is intelligent BPM that is expanding the window of what can be automated by enabling adaptable automation The mobile strategies in far too many organizations seem to be the building of apps that presume that customers will use their smartphones like mini laptops This avoids the fact that we now have a level of intimacy with our customer we ve never had before As discussed in the chapter BPM to Go

Supporting Business Processes in a Mobile and Sensing World our customers are carrying around a device that offers a range of capabilities unlike any laptop A smartphone produces volumes of meaningful data about our customers think about the 4Vs and is able to interact with that customer in ways that a laptop never can The growing ubiquity of connectivity always within reach combined with new services and capabilities such as mobile banking is a key part of driving constantly changing expectations Yet digital disruption is not limited to mobile devices and is in fact disrupting everywhere BPM is otherwise found and why BPM everywhere is becoming the new normal

Designing Efficient BPM Applications

Christine McKinty,Antoine Mottier,2016 Looking for efficiency gains in your business If you re a business analyst this practical guide will show you how to design effective business process management BPM applications Every business uses business processes these everyday tasks help you gain and retain customers stay profitable and keep your operations infrastructure functioning BPM specialists Christine McKinty and Antoine Mottier show you step by step how to turn a simple business procedure into an automated process based application Using hands on examples you ll quickly learn how to create an online process that s easy to use Each chapter builds on earlier material You don t have to have any programming experience to design business processes and if you have skills in designing workflows and understanding human interactions with processes you already have a headstart Through the course of this book you will Build a prototype of an application page Create the most frequent use flow in a process and define the data model Generate real process forms and produce the first version of the application Connect your application to external information systems and then build and test the complete application

Combining Business Process Management and Enterprise Architecture for Better Business Outcomes Claus T. Jensen,Owen Cline,Martin Owen,IBM Redbooks,2011-03-31 This IBM Redbooks publication explains how to combine business process management BPM and Enterprise Architecture EA for better business outcomes This book provides a unique synergistic approach to BPM and EA based on a firm understanding of the life cycles of the enterprise and the establishment of appropriate collaboration and governance processes When carried out together BPM

provides the business context understanding and metrics and EA provides the discipline to translate business vision and strategy into architectural change Both are needed for sustainable continuous improvement This book provides thought leadership and direction on the topic of BPM and EA synergies Although technical in nature it is not a typical IBM Redbooks publication The book provides guidance and direction on how to collaborate effectively across tribal boundaries rather than technical details about IBM software products The primary audience for this book is leaders and architects who need to understand how to effectively combine BPM and EA to drive as a key differentiator continuous improvement and transformational change with enterprise scope

Social BPM Keith D. Swenson, 2011-01-01 Business Process Management and Workflow are by their very nature social activities The collaboration and communication patterns that are now increasingly referred to as social computing were also fundamental to the BPM and workflow models of the early 1990s Yet it has been the recent explosion of social computing and accompanying success of social production from Linux to Wikipedia and Facebook to Twitter which have had the most dramatic impact on collaboration in business environments Today we see the transformation of both the look and feel of BPM technologies along the lines of social media as well as the increasing adoption of social tools and techniques democratizing process development and design It is along these two trend lines the evolution of system interfaces and the increased engagement of stakeholders in process improvement that Social BPM has taken shape
