Bibliographic Guide to Law, 1991 Handbook of Child Behavior Therapy in the Psychiatric Setting Robert T.

Ammerman, Michel Hersen, 1995 Behavioral interventions for childhood disorders are at last gaining wide acceptance among child psychiatrists and pediatricians Proven to be a relatively quick and effective method of treatment for everything from ADHD and conduct disturbances to separation anxiety and obsessive compulsive disorders behavioral therapy is rapidly becoming a preferred intervention strategy both in inpatient and outpatient environments Yet despite their growing enthusiasm for behavioral techniques practitioners are hard pressed to find useful guides and references targeted specifically for behavioral interventions with children in a psychiatric setting This book was intended to fill that void

Psychology on the Streets Thomas L. Kuhlman, 1994 Armed with good intentions but clueless about street culture they arrive hoping to win the trust and gratitude of people who haven t asked for their help Redefining Babes, Booze and Brawls Luoluo Hong, 1999 Despite evidence that 90% of violent crimes are committed by men higher education professionals and researchers still understand relatively little about the process by which male students acquire the attitudes knowledge values and skills which serve as deterrents to perpetrating violence against women and against other men Men Against Violence is a peer advocacy organization at a large public Research I institution in the South which focuses on the special and unique responsibility men have to end violence Through participation in a wide array of service learning community action and leadership opportunities MAV members challenge cultural norms which link masculinity with violence Types of violence targeted by MAV include fighting domestic violence rape vandalism hazing harassment hate crimes homicide and suicide Utilizing a sociological public health perspective that incorporates theories of masculinity and models of student development this dissertation is a case study of the organization Men Against Violence It examines the ways in which a close knit association of men generated and sustained an organizational culture that encourages and rewards non violence among its members as well as begins to reframe traditional conceptions of masculinity Subjects for this study consisted of the eight

male students who comprised the 1997-1998 Executive Board of MAV. Primary research questions were 1. What are the characteristics of an organizational culture of non violence that is created and maintained among a close knit group of male college students? 2. How can higher education professionals, particularly women, facilitate the process of creating such an organizational culture? Chapter 1 addresses methodological concerns in the dissertation. Chapters 2 and 3 review current literature regarding men and campus violence. Chapter 4 provides a historical narrative of the founding and development of MAV. Chapter 5 presents cultural themes which emerged during content analysis of data from ethnographic interviews and participant observation, and Chapter 6 offers theoretical and practical implications of the study.

Intimate Betrayal Vernon R. Wiehe, Ann Richards, 1995-07-13. Focused and timely. Chapters on special issues highlight marital rape, legal factors, the recovery process, and prevention. Important factual information is interspersed with painfully graphic first person responses from survivors. This book is an important contribution to the trauma and recovery literature. Terry L. Sweig in *READINGS: A Journal of Reviews and Commentary in Mental Health*. This book addresses the problem of acquaintance rape and its complexity in a comprehensive manner. The book provides helpful information and treatment suggestions for those professionals who wish to know more about this important issue. It is a useful addition to the field of mental health.

Doody's Health Sciences Book Review Journal. Spousal rape and acquaintance rape are treated in this book. It is an important text for therapists in the field. Ron MacIssac review in *What's Happening*. Victoria B. C. Every year thousands of women are raped by someone they know and never report the sexual assault, partly because acquaintance rape is still widely misunderstood in our society and victims are often blamed for the crime. Addressing a need to change perceptions about this type of assault, this important book informs and educates about the nature of acquaintance rape and its impact on the victim, intervention, and prevention. The chapters on intervention include material on crisis intervention, tools for effective rape counseling, and strategies for meeting the psychosocial needs of survivors who are facing long term recovery due to previous sexual assault victimization. Survivors vividly describe the events in their own words, bringing home the horror of acquaintance rape and the immediate need for action to prevent it. The authors also offer a special chapter on marital rape to expose this long denied and insidious form of rape. In addition, a useful review of current literature pinpoints interventions crucial to rape prevention. *Intimate Betrayal* is essential reading for mental health professionals, crisis centers, student services, and law enforcement personnel, pastoral counselors, legal professionals, social workers, and advanced clinical students. But in addition to the helping professionals, this memorable book provides information important to any reader interested in understanding the nature and treatment of acquaintance rape.

covered as well as a bibliography and guidelines for practice Particularly useful for board certification review Symptoms of Depression Charles G. Costello, 1993-01-18 The whole is greater than the sum of its parts This is true of behavioral disorders as well as the men and women in whom they arise and few psychologists would contend that a syndrome such as depression can be reduced to the symptoms it comprises But true scientific progress whether it be in atomic physics or the behavioral sciences cannot occur without a rigorous ongoing investigation of the constituent elements of the phenomena under investigation The purpose of this groundbreaking book then is to advance our understanding of depression by directing focus away from the global syndrome of depression and onto the individual symptoms it comprises to more clearly define them their origins and their functional relationships To this end Charles G Costello in Symptoms of Depression has brought together contributions from some of the field's foremost researchers and clinicians who share their findings on symptoms common to depressive disorders Over the course of twelve chapters they offer their insights into all major symptoms of depression including dysphoria anhedonia sleeping problems hopelessness suicide attempts social dysfunction cognitive dysfunction eating problems and more Each chapter deals with a separate symptom and follows a common format covering definition measurement frequency of occurrence a review of clinical and experimental findings that have led to the current theories of the causes of the symptom its functional relationship to other symptoms of depression and implications for clinical practice In the final chapter Charles G Costello suggests ways in which more meaningfully defined syndromes of depression might arise from research and theories about specific symptoms The only work focusing exclusively on current knowledge of the symptoms of depression this book affords clinicians and researchers a fresh approach to understanding and treating depressive disorders In so doing Symptoms of Depression may serve as the foundation for a more rigorous systematic approach to psychopathology **Psychological Disturbance in Adolescence** Irving B. Weiner, 1992-01-17

What this book is about is how clinicians can do the best possible job of recognizing abnormal psychological development in an adolescent identifying what kind of disturbance is present and selecting effective methods of helping the young person overcome the problem As in the earlier edition the first two chapters offer a detailed survey of current theoretical issues in adolescent psychology normality abnormality in adolescence and patterns of adolescent psychopathology Also covered in these chapters are key issues of assessment classification and epidemiology The remainder of the book with the exception of the last chapter is organized from the perspective of the practicing clinician and consists of chapters covering problems in adolescent patients including schizophrenia depression and suicide school phobia delinquent behavior substance abuse and more
