Steeby, 2023 **Financial Mathematics For Actuarial Science** Richard James Wilders, 2020-01-24 *Financial Mathematics for Actuarial Science* The Theory of Interest is concerned with the measurement of interest and the various ways interest affects what is often called the time value of money. TVM Interest is most simply defined as the compensation that a borrower pays to a lender for the use of capital. The goal of this book is to provide the mathematical understandings of interest and the time value of money needed to succeed on the actuarial examination covering interest theory. Key Features: Helps prepare students for the SOA Financial Mathematics Exam. Provides mathematical understanding of interest and the time value of money needed to succeed in the actuarial examination covering interest theory. Contains many worked examples, exercises, and solutions for practice. Provides training in the use of calculators for solving problems. A complete solutions manual is available to faculty adopters online. **ACTEX Study Manual for SOA Exam IFM** Johnny Li, 2020 Author Johnny Li utilizes a completely different pedagogical approach. By reading this manual, you should be able to understand the concepts and techniques you need for the exam. Where possible, concepts and techniques are demonstrated with examples and integrated into practice problems included in the manual. To help you better prepare for the exam, the author intentionally writes the practice problems and the mock exams in a similar format to the released exam and sample

questions Becoming acquainted with the style and format will help you recollect information you ve learned more easily and prevent you from needing extra time to solve problems on the actual exam The author has gone to the painstaking effort of putting together a manual that is targeted and focused on teaching the content specifically tested on the IFM exam unlike the Derivatives Markets text Li approaches the concepts in a more streamlined fashion and incorporates sample questions that have proven to accurately represent how students experience the SOA exams The manual is broken into two broad themes Quantitative and Qualitative The first part of this manual focuses on the Quantitative theme which encompasses all of the topics covered in Derivatives Markets the required text authored by R L McDonald and the technical topics from Corporate Finance the required text authored by J Berk and others To help you develop a strong foundation we begin with the easiest calculations that are just straightforward extensions of what you have learnt in Exam FM These are then followed by progressively harder calculations ranging from the binomial model to various versions of the Black Scholes formula The second part of the manual is devoted to the Qualitative theme which encompasses a lot of definitions and hard facts that you have to memorize unfortunately There are some calculations in the Qualitative theme but they are typically trivial To help you breeze through this theme the materials in this theme are presented in an easy to read point form with the most important points being clearly highlighted Of course we have practice problems to test how well you can remember the materials The manual concludes with several mock exams with original questions      *SOA Exam FM/2* Matthew J.
