Disabled Children and Young People in Sport, Physical Activity and Physical Education

Anthony J. Maher, Justin A. Haegerle, 2024-11-28 This book presents research on disabled children and young people in sport physical activity and physical education settings using empirical data gathered either with or from disabled children and young people centring their experiences and amplifying their voices while decentralising non disabled voices in research about them Much of the albeit limited research relating to disabled children and young people in sport physical activity and physical education settings is from the perspective of teachers school leaders coaches support assistants and special educational needs coordinators While this research has undoubtedly contributed to developing a rich tapestry of knowledge about disability and sport physical activity and physical education the views and experiences of disabled children and young people are conspicuous by their absence Thus in this book contributors showcase research that centres on the experiences and amplifies the voices of disabled children and young people When reading these articles readers are encouraged to reflexively consider the ways and extent to which their own research and practice endeavours to include empower and emancipate disabled children and young people Contributors hope that this book will encourage sport physical activity and physical education scholars especially those who do not research disability to consider the significance of including disabled people as active participants in more general research studies This book will be an essential reading for those who want to learn more about involving disabled children and young people in research centring their experiences and amplifying their voices in sport physical activity and physical education as part of the multi stakeholder approach advocated by Vickerman and Maher 2018 It was originally published as a special issue of Sport Education and Society

Integrated Lifecycle Services for Persons with Disabilities David L. Lovett, Kathryn A. Haring, 2012-12-06 The field of education is under pressure both external and internal to improve the services provided to all students In American society and elsewhere there is a concern that current educational practices fail to adequately prepare many students to be productive citizens There has been a call for educational services that are more responsive to the needs of students that use effective educational practices that involve parents and the local community and that adequately prepare teachers to assume more professional roles Over the last several decades special educators have addressed these and other critical issues as they relate to students with disabilities The knowledge gained from these endeavors can be useful in the reshaping of schools for all students those with disabilities and those without Indeed this information may be useful for services beyond school whether for young children or adults This volume has been written to address how people with disabilities can be effectively served in settings with their nondisabled peers Because many of the students who are not well served by current educational practices have similar needs as students with disabilities it is anticipated that some of this information may be useful in the discussion regarding the reshaping of educational systems It is also anticipated that the material presented will help in the design of more effective coordinated systems that serve people with disabilities throughout their lives
