

Grades 3-5

Children may think that with all kinds of ideas about numbers, shapes, measurements, time, and money—ideas formed from the experiences they have while playing—the things they see are obvious, the concepts correct, as children's books, all around them. Yet we wonder some children finally were measuring and perhaps to correct their ideas, mathematics of concepts.

How mathematics then grows and are comprehended throughout their classroom years.

There is no correct the inherent knowledge that students bring to our classrooms with the mathematics program adopted for our school system. Just as important, from the way we teach, the mathematics we are introducing and understanding is accurate and will not need to be brought to bear again.

This companion resource to Math Misconceptions contains these questions by providing explicit instructional ideas and engaging activities that can be implemented in any classroom. Aligned with the NCTM Standards for Mathematical Practices (NCTM) and the NCTM Standards for Mathematical Practices (NCTM).

- address the basic concepts covered in each of the five NCTM content strands
- offer teachers instructional ideas (What to Do) for correcting misconceptions and preventing misconceptions from taking root
- includes five fun games for more than 10 activities and games that can be immediately implemented into your classroom instruction
- helps guide your classroom instruction with suggested "Look For" as students work through the activities.

The downloadable resource includes printable versions of the five fun games for English and Spanish, allowing you to customize the activities for your particular classroom.

Through your students' math misconceptions, this practical resource will help make it all make sense and move math achievement in your classroom.
