Astin,2023-07-03 This book explores the many ways in which the obsession with being smart distorts the life of a typical college or university and how this obsession leads to a higher education that shortchanges the majority of students and by extension our society s need for an educated population The author calls on his colleagues in higher education to return the focus to the true mission of developing the potential of each student However smart they are when they get to college both the student and the college should be able to show what they learned while there Unfortunately colleges and universities have embraced two very narrow definitions of smartness the course grade and especially the standardized test A large body of research shows that it will be very difficult for colleges to fulfill their stated mission unless they substantially broaden their conception to include student qualities such as leadership social responsibility honesty empathy and citizenship Specifically the book grapples with issues such as the following Why America s 3 000 plus colleges and universities have evolved into a hierarchical pecking order where institutions compete with each other to recruit smart students and where a handful of elite institutions at the top of the pecking order enroll the smartest students Why higher education favors its smartest students to the point where the not so smart students get second class treatment Why so many colleges find it difficult to make good on their commitment to affirmative action and equality of opportunity Why college faculties tend to value being smart more than developing students smartness i e teaching and learning *Cracking the CBEST, 2nd Edition* Rick Sliter,2002 The CBEST is required for teacher certification in California and Oregon Each new teacher must receive certification which means that they must pass the

Who Gets In and Why Jeffrey Selingo, 2020-09-15 From award winning higher education journalist and New York Times bestselling author Jeffrey Selingo comes a revealing look from inside the admissions office one that identifies surprising strategies that will aid in the college search Getting into a top ranked college has never seemed more impossible with acceptance rates at some elite universities dipping into the single digits In Who Gets In and Why journalist and higher education expert Jeffrey Selingo dispels entrenched notions of how to compete and win at the admissions game and reveals that teenagers and parents have much to gain by broadening their notion of what qualifies as a good college Hint it's not all about the sticker on the car window Selingo who was embedded in three different admissions offices a selective private university a leading liberal arts college and a flagship public campus closely observed gatekeepers as they made their often agonizing and sometimes life changing decisions He also followed select students and their parents and he traveled around the country meeting with high school counselors marketers behind the scenes consultants and college rankers While many have long believed that admissions is merit based rewarding the best students Who Gets In and Why presents a more complicated truth showing that who gets in is frequently more about the college's agenda than the applicant In a world where thousands of equally qualified students vie for a fixed number of spots at elite institutions admissions officers often make split second decisions based on a variety of factors like diversity money and ultimately whether a student will enroll if accepted One of the most insightful books ever about getting in and what higher education has become Who Gets In and Why not only provides an unusually intimate look at

how admissions decisions get made but guides prospective students on how to honestly assess their strengths and match with the schools that will best serve their interests
