Architectural Guidebook To The National Parks California Oregon Washington:

An Architectural Guidebook to the National Parks Harvey H. Kaiser, 2002 Harvey Kaiser takes us on a tour through the historic structures of California Oregon and Washington's national parks. Discussing the architectural elements as well as the history of each building, he shows how architectural form combined with history and natural beauty can create an inspiring work of art. Architectural Guidebook to the National Parks provides maps and detailed directions to historic buildings in national parks such as Death Valley Yosemite Crater Lake and Mount Rainier. It also includes descriptions of different types of parks, the history and founding of each park, and literary quotes describing the parks. **The National Park Architecture Sourcebook** Harvey H. Kaiser, 2008-03-20 In one accessible, engaging, and easy-to-use volume, readers will find historical context, directions, factual information, and analytical architectural analysis for more than two hundred places of interest across the United States. The traveler, armchair behind the wheel or on foot, the researcher seeking a comprehensive view of some of America's greatest ideas and accomplishments, and the architect and landscape architect seeking sources of inspiration will find a rewarding journey inside this book. **BOOK JACKET** **The Parks Belong to the People** Joe Weber, Selima Sultana, 2024-04-01 In examining the 424 units of the U.S. national park system, geographers Joe Weber and Selima Sultana focus attention on the historical geography of the system as well as its present distribution, covering the diversity of places under the control of the National Park Service (NPS). This includes the famous national parks such as the Grand Canyon, Yellowstone, and Yosemite, and the lesser-known national monuments, memorials, lakeshores, seashores, rivers, recreation areas, preserves, reserves, parkways, historic sites, historic parks, and a range of battlefields, as well as more than twenty additional sites not fitting into any of these categories, such as the White House. The geographic view of The Parks Belong to the People sets it apart from others that have taken a solely historical approach. Where parks are located, what they are near, where their visitors come from, and how land use and activities are organized within parks are some of the fundamental issues discussed. The majority of units in the NPS are devoted to recreation areas or historic sites, such as battlefields, archaeological sites, or sites devoted to a specific person, and this is reflected in the authors' approach. What we think of as a national park has changed over the years and will continue to change. Weber and Sultana emphasize changing social and political environments in which NPS units were created and the roles they serve, such as protecting scenery, providing wildlife habitats, preserving history, and serving as scientific laboratories and places for outdoor recreation. The authors also focus on parks as public facilities and sites of economic activities. National parks were created by people for people to enjoy at great cost and with great benefit. They cannot be understood without taking this human context into account. **CRM**, 2006 Journal of the Society of Architectural Historians Society of Architectural Historians, 2004 Includes special issues **Explorer's Guide Yosemite & the Southern Sierra Nevada** David T.
