Caring Architecture Ebba Höglström, Catharina Nord, 2017-03-07 Architecture is hard stuff It is formed by walls roofs floors all components of hard materials stone glass and wood It distributes people in space and directs their doings and movements Institutions are even harder stuff Order is pushed a step further by the coerciveness of discursive architectural models and caring practices restricting options to certain ways of thinking and acting This book illuminates how people and spaces negotiate and often challenge regularities and patterns embedded in the meeting between architecture and institutions It contains a number of essays by authors from disciplines such as human geography architecture planning design social work and education The contributions discuss different examples from institutions in which care is carried out such as assisted living facilities residential care for children psychiatric care facilities hospitals and prisons By adopting a non representational perspective emergent practices render visible capacities of being flexible and mouldable in which institutional architecture is defied contested and transformed New situations appear which transgress physical space in partnership with those who populate it whether humans or non humans This book reveals the relational and transformative conditions of care architecture and the ways in which institutions transform or not into caring architecture **An**

Mining a rich interdisciplinary mix of sources including stoneware jugs personal correspondence paintings inventories and literature written for the dining room this study offers a critical and entirely original examination of the function of early modern images for the people who owned and viewed them The study explores the emergence functions and material culture of the Antwerp dinner party during the heady days of the mid sixteenth century when Antwerp s art market was thriving and

a new wealthy non noble class dominated the city The author recontextualizes some of Bruegel s work within the cultural nexus of the dining room where material culture and theatrical performance met humanist wit and the desire for professional advancement The narrative also touches on the reception of Northern art in Lombardy on intersections among painting material culture and theater and on intellectual history

Handbook of Material Culture Chris Tilley, Webb Keane, Susanne Kuechler, Mike Rowlands, Patricia Spyer, 2006-01-05 The study of material culture is concerned with the relationship between persons and things in the past and in the present in urban and industrialized and in small scale societies across the globe The Handbook of Material Culture provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things It is cutting edge rather than simply reviewing the field as it currently exists It also attempts to chart the future the manner in which material culture studies may be extended and developed The Handbook of Material Culture is divided into five sections Section I maps material culture studies as a theoretical and conceptual field Section II examines the relationship between material forms the human body and the senses Section III focuses on subject object relations Section IV considers things in terms of processes and transformations in terms of production exchange and consumption performance and the significance of things over the long term Section V considers the contemporary politics and poetics of displaying representing and conserving material and the manner in which this impacts on notions of heritage tradition and identity The Handbook charts an interdisciplinary field of studies that makes an unique and fundamental contribution to an understanding of what it means to be human It will be of interest to all who work in the social and historical sciences from anthropologists and archaeologists to human geographers to scholars working in heritage design and cultural studies
