of their responsibilities have been taken over by other disciplines within the building construction industry. Once upon a time we might have seen the architect as the conductor of the orchestra; now he or she is but one cog in a vast and increasingly complex machine. In an attempt to find a way out of this crisis, there is growing debate about how architects might reassert the importance of their role and influence. On one side of this argument are those who believe that architects must refocus their attention on the internal demands of the discipline. On the other are those who argue that architects must instead reacquaint themselves with what many still believe to be the discipline's core mission of advancing social progress and promoting the public good, and at the same time the scope of their traditional disciplinary remit. At root, this question is fundamentally about freedom: about whether architects still possess it if they have ever done, and whether it is possible to find the professional disciplinary and individual autonomy to be able to define the spheres of their own practice. Presenting a variety of views and perspectives, this issue of AD takes us to the heart of what freedom means for architecture as it adapts and evolves in response to the changing contexts in which it is practised in the 21st century. Contributors include Phillip Bernstein, Peggy Deamer, Adam Nathaniel Furman, Kate Goodwin, Charles Holland, Anna Minton, Patrik Schumacher, Alex Scott, Whitby Ines Weizman, and Sarah Wigglesworth. Featured architects: Atelier Kite, ScottWhitbyStudio, C S Architects, Anupama Kundoo, Noero Architects, Umbrellium, and Zaha Hadid Architects.

Visualizing the Street Pedram Dibazar, Judith Naeff, 2025-10-01. From user-generated images of streets to professional architectural renderings and from digital maps and drone footages to representations of invisible digital ecologies, this collection of essays analyses the emergent practices of visualizing the street. Today, advancements in digital technologies of the image have given rise to the production and dissemination of imagery of streets and urban realities in multiple forms. The ubiquitous presence of digital visualizations has in turn created new forms of urban practice and modes of spatial encounter. Everyone who carries a smartphone not only plays an increasingly significant role in the production, editing, and circulation of images of the street but also relies on those images to experience urban worlds and to navigate in them. Such entangled forms of image making and image sharing have constructed new imaginaries of the street and have had a significant impact on the ways in which contemporary and future streets are

understood imagined documented navigated mediated and visualized Visualizing the Street investigates the social and cultural significance of these new developments at the intersection of visual culture and urban space The interdisciplinary essays provide new concepts theories and research methods that combine close analyses of street images and imaginaries with the study of the practices of their production and circulation The book covers a wide range of visible and invisible geographies From Hong Kong s streets to Rio s favelas from Sydney s suburbs to London s street markets and from Damascus war torn streets to Istanbul s sidewalks and engages with multiple ways in which visualizations of the street function to document street protests and urban change to build imaginaries of urban communities and alternate worlds and to help navigate streetscapes Architectural Details Emily Cole,2014-09-15 Do you know a Doric column when you see one Of course But what about an entablature a hypostyle a pylon or a pagoda Architecture Styles uses beautifully engraved plates from the great works of architectural history to illustrate a show and tell journey round the architecture of civilizations east and west from Ancient Egypt to the Industrial Revolution Most of the drawings and engravings have been taken from early sources unparalleled for their elegance and delicacy of line as well as for the amount of fine detail they offer Extended captions and annotation supply you with a complete naming of parts which as well as identifying and defining the correct terminology will help you to understand how architects have planned and made the buildings of the past from Amenhotep to Palladio and Vitruvius to Wren The Oxford History of British and Irish Catholicism, Volume II John Morrill,Liam Temple,2023-09-01 The second volume of The Oxford History of British Irish Catholicism traces the fortunes of Catholic communities in England Wales Scotland and Ireland across a period of great uncertainty and change From the outset of the Civil Wars in 1641 to the Jacobite rising of 1745 Catholics in the three kingdoms were varied in their responses to tumultuous events and tantalising opportunities The competing forces of dynamism and conservatism within these communities saw them constantly seeking to re situate or re imagine themselves as their relationship to the state to Protestantism to continental Europe as well as the wider world beyond changed and evolved Consciously transnational the volume moves away from insular conceptualisations of Catholicism and instead stresses connections with the European continent and beyond Early chapters give broad overviews of the experience of Catholics in the period tracking key events and important developments from 1641 to 1745 Chapters then address specific aspects of Catholicism including empire and overseas missions missionary activity devotion spirituality trade material culture music and architecture among others revealing a complex rich and varied history of Catholicism in the period *Libraries of Light* Alistair Black,2016-10-04 For the first hundred years or so of their history public libraries in Britain were built in an array of revivalist architectural styles This backward looking tradition was decisively broken in the 1960s as many new libraries were erected up and down the country In this new Routledge book Alistair Black argues that the architectural modernism of the post war years was symptomatic of the age s spirit of renewal In the 1960s public libraries truly became libraries of light and Black further

explains how this phrase not only describes the shining new library designs with their open plan decluttered Scandinavian inspired designs but also serves as a metaphor for the public library's role as a beacon of social egalitarianism and cultural universalism. A sequel to *Books Buildings and Social Engineering* 2009 Black's new book takes his fascinating story of the design of British public libraries into the era of architectural modernism. Motherly Rebekah Pryor, 2022-01-31 How can contemporary art reimagine the body of the mother in relation to a feminist Christian conception of the divine? And at the level of culture, what might be the implications of the maternal body imaged as ordinary, multiple, generative and divine? Following movements in her own visual art practice and traversing the discourses of feminist theory, contemporary art and philosophy of religion, artist and scholar Rebekah Pryor considers philosopher Luce Irigaray's key notions of sexual difference, the sensible, the transcendental and love at work in thinking on the way to proposing alternate artistic and theological motifs of the maternal body and the divine for our time. Five new motifs emerge, challenging iconographic conventions and proposing an expanded vision of the mother and the divine in feminist theology and contemporary art. *Proceedings of the 4th Biennial of Architectural and Urban Restoration.
