The Making of the Middle Sea Cyprian Broodbank,2024-10-17 The Mediterranean has been for millennia one of the global cockpits of human endeavour. World-class interpretations exist of its Classical and subsequent history, but there has been remarkably little holistic exploration of how its societies, culture, and economies first came into being, despite the fact that almost all the fundamental developments originated well before 500 BC. Mediterranean archaeology is one of the world's richest sources for the reconstruction of ancient societies, yet this book is the first to draw in equal measure on ideas and information from the European, western Asian, and African flanks, as well as the islands at the Mediterranean's heart, to achieve a truly innovative focus on the varied trajectories and interactions that created this maritime world. *The Making of the Middle Sea* is extensively illustrated and ranges across disciplines, subject matter, and chronology, from early humans and the origins of farming and metallurgy to the rise of civilizations: Egyptian, Levantine, Minoan, Mycenaean, Phoenician, Etruscan, early Greek, and ultimately pan-Mediterranean.

Urban Life in the Distant Past Michael E. Smith,2023-03-30 In this book, Michael Smith offers a comparative and interdisciplinary examination of ancient settlements and cities. Early cities varied considerably in their political and economic organization and dynamics. Smith here introduces a coherent approach to urbanism that is transdisciplinary in scope, scientific in epistemology, and anchored in the urban literature of the social sciences. His new insight is energized crowding, a concept that captures the consequences of social interactions within the built environment, resulting from increases in population size and density within settlements. Smith explores the implications of features such as empires, states, markets, households, and neighborhoods for urban life and society through case studies from around the world. Direct influences on urban life, as mediated by energized crowding, are organized into institutional top-down forces and generative bottom-up processes. Smith's volume analyzes their similarities and differences with contemporary cities and highlights the relevance of ancient cities for understanding urbanism and its challenges today.

The Image of the Feminine in the Poetry of W.B. Yeats and Angelos Sikelianos Anastasia Psoni,2018-12-19 Modernism, as a powerful movement, saw the literary and artistic traditions, as well as pure science, starting to evolve radically, creating a crisis, even chaos, in culture and society. Within this chaos, myth offered an ordered picture of that world, employing symbolic and poetic images. Both W. B. Yeats and Angelos Sikelianos embraced myth

and symbols because they liberate imagination and raise human consciousness bringing together humans and the cosmos. Being opposed to the rigidity of scientific materialism that inhibits spiritual development, the two poets were waiting for a new age and a new religion, expecting that they themselves would inspire their community and usher in the change. In their longing for a new age, archaeology was a magnetic field for Yeats and Sikelianos as it was for many writers and thinkers. After Sir Arthur Evans's discovery of the Minoan Civilization, where women appeared so peacefully prominent, the dream of re-creating a gynocentric mythology was no longer a fantasy. In Yeats's and Sikelianos's gynocentric mythology, the feminine figure appears in various forms and like in a drama it plays different roles. Significantly, a gynocentric mythology permeates the work of the two poets and this mythology is of pivotal importance in their poetry, their poetics, and even in their life, as the intensity of their creative desire brought to them female personalities to inspire and guide them. Indeed, in Yeats's and Sikelianos's gynocentric mythology, the image of the feminine holds a place within a historical context, taking the reader into a larger social, political, and religious space.
