

**11. EFFECTS LEVEL:** Use this control to adjust the level of the selected digital effect.

**12. CD INPUT:** Use these RCA jacks to connect the line level (or headphones) output of a CD player, tape deck or rhythm machine to the amplifier. The inputs to these jacks are summed into a mono signal which is fed into the BA210SP's power amplifier. The signal level from these jacks is adjusted by the amplifier's Level control (#8). If the signal from the source connected to these jacks is too strong, use the output level control on the source to adjust the signal to obtain the proper level for a good mix.

**13. HEADPHONES:** Use this jack to listen to the amplifier through a pair of stereo headphones. The internal speaker is disconnected when the headphones jack is used.

**14. FOOTSWITCH:** Use this jack to connect the supplied two button footswitch to the amplifier for remote control of the digital effects. For information on programming the footswitch, see page 7.

**15. BAL. LINE OUT:** This jack supplies a post-eq, balanced line level signal for connecting to a house sound board, recording unit or external amplifier.

**16. POWER:** Use this switch to turn the amplifier on or off. The adjacent LED will illuminate when the amplifier is turned on.

**17. AC LINE CORD (rear panel, not shown):** This heavy duty, grounded, three wire power cord is to be plugged into a safely-wired, grounded, 120 volt, 60 cycle AC power outlet. **DO NOT** attempt to defeat the ground connection of this cable! If your amplifier was purchased outside of the United States, see the unit's rear panel for its power and voltage ratings and follow the above guidelines.
