Multiple Solution Methods for Teaching Science in the Classroom Stephen DeMeo, 2008 For the first time in science education the subject of multiple solution methods is explored in book form While a multiple method teaching approach is utilized extensively in math education there are very few journal articles and no texts written on this topic in science Teaching multiple methods to science students in order to solve quantitative word problems is important for two reasons First it challenges the practice by teachers that one specific method should be used when solving problems Secondly it calls into question the belief that multiple methods would confuse students and retard their learning Using a case study approach and informed by research conducted by the author this book claims that providing students with a choice of methods as well as requiring additional methods as a way to validate results can be beneficial to student learning A close reading of the literature reveals that time spent on elucidating concepts rather than on algorithmic methodologies is a critical issue when trying to have students solve problems with understanding It is argued that conceptual understanding can be enhanced through the use of multiple methods in an environment where students can compare evaluate and verbally discuss competing methodologies through the facilitation of the instructor This book focuses on two very useful methods proportional reasoning PR and dimensional analysis DA These two methods are important because they can be used to solve a large number of problems in all of the four academic sciences biology chemistry physics and earth science This book concludes with a plan to integrate DA and PR into the academic science curriculum starting in late elementary school through to the introductory college level A challenge is presented to teachers as well as to textbook writers who rely on the single method paradigm to consider an alternative way to teach scientific problem solving

Cebral-Loureda,Elvira G. Rincón-Flores,Gildardo Sanchez-Ante,2023-08-01 The philosopher Spinoza once asserted that no one knows what a body can do conceiving an intrinsic bodily power with unknown limits Similarly we can ask ourselves about Artificial Intelligence AI To what extent is the development of intelligence limited by its technical and material substrate In other words what can AI do The answer is analogous to Spinoza s Nobody knows the limit of AI Critically considering this issue from philosophical interdisciplinary and engineering perspectives respectively this book assesses the scope and pertinence of AI technology and explores how it could bring about both a better and more unpredictable future What AI Can Do highlights at both the theoretical and practical levels the cross cutting relevance that AI is having on society appealing to students of engineering computer science and philosophy as well as all who hold a practical interest in the technology

Measuring College Learning Responsibly Richard Shavelson,2010 This book examines current practices in assessment of learning and accountability at a time when accrediting boards the federal government and state legislatures are requiring higher education to account for such outcomes as student retention graduation and learning Closing the Achievement Gap from an International Perspective Julia V. Clark,2013-10-24 In a changing world that demands new skills a vital concern of public education is the gap in academic performance between low and high achieving students There is no excuse for the achievement gaps that persist among poor and minority students in schools today All students can succeed at high levels regardless of race ethnicity and economic background Several countries have successfully confronted inequities in achievement demonstrating that any school can close achievement gaps regardless of the community they serve and that all students can achieve at high levels when they are provided with the right opportunities This book is about understanding what factors selected countries have applied to promote progress and what factors contribute to progress in the closing of achievement gaps It is about creating opportunities for all students Closing the Achievement Gap from an International Perspective Transforming STEM for Effective Education is written in response to rising concern for the improvement of quality education especially in mathematics and science provided to all students The contributors take a systematic view of the subject beginning with a cross national analysis of teacher qualifications and the achievement gap that spans 50 countries The content of the book is organized in sections describing education around the globe North and South America Europe Asia Africa and Australia Individual chapters offer close up analysis of efforts to close achievement gaps in the U S

and Canada Mexico England Turkey China South Africa and Australia among many others The contributors provide information on the achievement gap in mathematics and science review current research and present strategies for fostering improvement and raising performance with a focus on school related variables that adversely affect educational outcomes among poor and minority students The authors of the various chapters looked at how students data correlated with classroom practices teacher instruction and academic programming as part of their efforts to measure student growth Qualitative and quantitative data are provided to provide evidence not only of the problem but also for the solution The book concludes with a chapter on promoting equality and equity to shrink the achievement gap worldwide

Changing Self-Destructive Habits Matthew D. Selekman, Mark Beyebach, 2014-09-25 For the first time in one volume self harm substance abuse eating disordered behavior gambling and Internet and cyber sex abuse five crippling self destructive behaviors are given a common conceptual framework to help with therapeutic intervention Matthew Selekman and Mark Beyebach two internationally recognized therapists know first hand that therapists see clients who have problems with several of these habits in varying contexts They maintain an optimistic positive solution focused approach while carefully addressing problems and risks The difficulties of change the risk of slips and relapses and the ups and downs of therapeutic processes are widely acknowledged and addressed Readers will find useful hands on therapeutic strategies and techniques that they can use in both individual and conjoint sessions during couple family and one on one therapy Detailed case examples provide windows to therapeutic processes and the complexities in these cases Clinical interventions are put in a wider research context while research is reviewed and used to extract key implications of empirical findings This allows for a flexible and open therapeutic approach that therapists can use to integrate techniques and procedures from a variety of approaches and intervention programs

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the

practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation
