Mobile Technologies and Augmented Reality in Open Education Kurubacak, Gulsun, Altinpulluk, Hakan, 2017-02-22 Novel trends and innovations have enhanced contemporary educational environments. When applied properly, these computing advances can create enriched learning opportunities for students. *Mobile Technologies and Augmented Reality in Open Education* is a pivotal reference source for the latest academic research on the integration of interactive technology and mobile applications in online and distance learning environments. Highlighting scholarly perspectives across numerous topics such as wearable technology, instructional design, and flipped learning, this book is ideal for educators, professionals, practitioners, academics, and graduate students interested in the role of augmented reality in modern educational contexts.

Research Design in Aging and Social Gerontology Joyce Weil, 2025-06-27 This comprehensive book provides a review across methodological approaches and data collection methods commonly used with older adults in real life settings. It addresses the role of normative age-related sensory, cognitive, and functional changes, as well as the influence of generational cohort, age period, and cohort. Fully updated, this second edition reflects recent changes in gerontology and includes more information about equity, diversity, and inclusion; the impact of the COVID-19 pandemic; the use of virtual research methods; discussion about the researcher's reflexivity; the role of theory in research; qualitative research developments; an expansion of secondary analysis of data; and the use of artificial intelligence in research. Features include: Descriptions, evaluations, and applications of a wide range of methodological approaches and methods used to collect data about older persons; quantitative, qualitative, mixed, and emergent methods; photovoice; virtual environments, etc. Ways to match research questions to selection of method without a preconceived methodological preference or dominance. Real world and applied examples along with cases from the gerontological literature. How-to sections about reading output, software reports, and qualitative analysis screenshots from NVivo and quantitative SPSS output and interpretation. Pedagogical tools in every chapter such as text boxes, case studies, definitions of key terms, discussion questions, and references for further reading on chapter topics. Glossary of key terms, complete sample research report, and an overview of past methodological research design work in gerontology. This text is intended for upper-level undergraduates and masters students in aging and gerontology, as well as students in human development, applied anthropology, psychology, public health, sociology, and social work settings. Healthcare professionals, social workers, and care managers who work with older adults will also find this text a valuable resource. At www.routledge.com/cw/weil, instructors will find PowerPoint presentations, additional discussion questions, suggestions for in-class activities and assessments, and a sample syllabus. Students will find flashcards based on glossary terms, a downloadable copy of the sample research report, links to data sets, related websites, online videos, and podcasts for further reading, select gerontological journals, and multiple choice and true or false questions. *European Workshop on Structural Health Monitoring* Piervincenzo Rizzo, Alberto Milazzo, 2022-06-15 This volume gathers the latest advances

innovations and applications in the field of structural health monitoring SHM and more broadly in the fields of smart materials and intelligent systems as presented by leading international researchers and engineers at the 10th European Workshop on Structural Health Monitoring EWSHM held in Palermo Italy on July 4-7 2022 The volume covers highly diverse topics including signal processing smart sensors autonomous systems remote sensing and support UAV platforms for SHM Internet of Things Industry 4.0 and SHM for civil structures and infrastructures The contributions which are published after a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists

Processing of Foods and Biomass Feedstocks by Pulsed Electric Energy Eugene Vorobiev, Nikolai

Lebovka, 2020-04-10 This book presents a comprehensive range of research on pulsed electric energy used in food processing including sections on the fundamentals of electroporation and important techniques for the estimation of electroporation effects in various foods and biomass feedstocks By focusing on application over theory this book presents researchers with practical steps for processing techniques such as solid liquid extraction pressing osmotic dehydration drying freezing and cooking Special interest is given to the selective recovery and extraction of sugar inulin starch proteins polysaccharides polyphenols pigments flavor compounds phytochemicals and other of high value components from food biomasses such as fruits and vegetables leaves herbs mushrooms microalgae and suspensions of cells Processing of Foods and Biomass Feedstocks by Pulsed Electric Energy presents a singular overview of the biorefinery applications of pulsed electric energy for the processing of wastes and non food biomasses such as root and tuber crops grape waste lignocellulosic biomass oil crops and residues and seeds and peels of exotic and citrus fruits The book begins by presenting general information on the fundamentals of electroporation and information on the procedures and protocols involved Further chapters focus on the specific food processing operations involved and biorefinery applications for the processing of wastes and non food biomasses All of the relevant and up to date information any researcher needs on pulsed electric energy in food processing is presented here in this text

Urban Evolutionary Biology Marta Szulkin, Jason Munshi-South, Anne Charmantier, 2020 Cities

occupy about 3 per cent of the Earth's habitable land area and are home to one out of two humans worldwide both estimates are predicted to grow Urban space is thus becoming an important novel ecological niche for humans and wildlife alike Building on knowledge gathered by urban ecologists during the last half century evidence of evolutionary responses to urbanization has rapidly emerged Urban evolutionary biology is a nascent yet fast growing field of research and a fascinating testing ground for evolutionary biologists worldwide Urbanization offers a great range of opportunities to examine evolutionary processes because of the radically altered and easily quantifiable urban habitat and the large number of cities worldwide enabling rigorous replicated tests of evolutionary hypotheses Urban populations are increasingly exhibiting both neutral and adaptive evolutionary changes at levels ranging from genotypes to phenotypes The novelty of urban evolutionary biology is that these changes are driven by the cities we have built including effects of infrastructure pollution and social characteristics of our urban neighbourhoods It will thereby enrich the field of evolutionary biology with emergent yet incredibly potent new research themes where the urban habitat is key In a series of sixteen chapters written by leading evolutionary biologists working on urban drivers of evolution Urban Evolutionary Biology is the first academic book in the field It synthesizes current knowledge on evolutionary processes occurring literally on our doorstep across the globe and in each city independently Provided by publisher

Urban Simulation Modeling Jakub Vorel, 2015-01-01 This book *Urban Simulation Modeling An Introduction and Experimental Applications in the Czech Republic* provides readers with a review of basic urban simulation modeling methodology and discusses the constraints and potentials of its application in the Czech Republic The first part of the book elaborates on eleven distinct urban simulation models with the aim of illustrating the basic theoretical and methodological approaches to urban simulation modeling The analysis of the models focuses on the way the models represent essential urban entities and processes with the primary objective to make the assumptions on which the models are based more explicit Special emphasis is placed on the behavioral content of the models The first part concludes with a discussion of the potential use of the models for policy analysis In the second part of the book several experimental simulation models illustrate the potentials and limits of the micro simulation modeling of the most essential urban processes and provide methodological and technical guidance for their development and implementation in the Czech Republic

Sensors Bruno Andò, Francesco Baldini, Corrado Di Natale, Giovanna Marrazza, Pietro Siciliano, 2017-09-07 This book gathers the best papers presented at the Third Italian National Conference on Sensors held in Rome Italy from 23 to 25 February 2016 The book represents an invaluable and up to the minute tool providing an essential overview of recent findings strategies and new directions in the area of sensor research Further it addresses various aspects based on the development of new chemical physical or biological sensors assembling and characterization signal treatment and data handling Lastly the book applies electrochemical optical and other detection strategies to relevant issues in the food and clinical environmental areas as well as industry oriented applications

XIII Mediterranean Conference on Medical and Biological Engineering and Computing 2013 Laura M. Roa Romero, 2013-10-01 The general theme of MEDICON 2013 is Research and Development of Technology for Sustainable Healthcare This decade is being characterized by the appearance and use of emergent technologies under development This situation has produced a tremendous impact on Medicine and Biology from which it is expected an unparalleled evolution in these disciplines towards novel concept and practices The consequence will be a significant improvement in health care and well fare i e the shift from a reactive medicine to a preventive medicine This shift implies that the citizen will play an important role in the healthcare delivery process what requires a comprehensive and personalized assistance In this context society will meet emerging media incorporated to all objects capable of providing a seamless adaptive anticipatory unobtrusive and pervasive assistance The challenge will be to remove current barriers related to the lack of knowledge required to produce new opportunities for all the society while new paradigms are created for this inclusive society to be socially and economically sustainable and respectful with the environment In this way these proceedings focus on the convergence of biomedical engineering topics ranging from formalized theory through experimental science and technological development to practical clinical applications

Hidden Geographies Marko Krevs, 2021-10-21 This book defines and discusses the term hidden geographies in two ways systematically and by presenting a variety of

examples of the research fields and topics concerning hidden geographies with the aim of stimulating further basic and applied research in this area While the term is quite rarely used in the scientific literature more often as a figure of speech than to illustrate or problematize its deeper meaning we argue that hidden geographies are everywhere and many of them have significant impacts on other natural and social phenomena and processes subsequently triggering changes for example in landscape economy culture health or quality of life The introductory section of the book conceptualises hidden geographies and discusses cognitive geography symbolization of space and the hidden geographies in mystical literature Case studies of hidden environmental geographies address soils air pollution coastal pollution and the allocation of an astronomical tourism site Revealing hidden historical and sacred places is illustrated through examples of the visualisation of the subterranean mining landscape the analysis of the historical road network and trade border stones and historical spatial boundaries and the monastic Carthusian space Hidden urban geographies are discussed in terms of the urban development of an entire city presenting the role of geography in rescuing architecture revealing illegal urbanisation and the quality of habitation in Roma neighbourhoods Case studies of hidden population geographies shed light on the ageing of rural populations and the impact of spatial demographic disparities on fertility variations Discussions of hidden social and economic geographies problematize recent social changes and conflicts in a country present the implementation of the fourth industrial revolution and borders as hidden obstacles in the organisation of public transport Hidden geographies are explicitly linked to perceptions and explanations in case studies that address local responses to perceived marginalisation in a city the solo women travellers perceived risk and safety and hidden geographical contexts of visible post war landscapes The book brings such a diversity of views ideas and examples related to hidden geographies that can serve both to deepen their understanding and their various impacts on our lives and environment and to attract further cross disciplinary interest in considering hidden geographies in research and in our every day lives
