Squires, 2017-03-09 *Meltdown* reveals how the Consumer Financial Protection Bureau was able to curb unsafe and unfair practices that led to the 2008 financial crisis In interviews with key government industry and advocacy groups along with deep archival research Kirsch and Squires show where the CFPB was able to overcome many abusive practices where it was less able to do so and why Open for business in 2011 the CFPB was Congress's response to the financial catastrophe that shattered millions of middle class and lower income households and threatened the stability of

the global economy But only a few years later with U S economic conditions on a path to recovery there are already disturbing signs of the re emergence of the high risk high reward credit practices that the CFPB was designed to curb This book profiles how the Bureau has attempted to stop abusive and discriminatory lending practices in the mortgage and automobile lending sectors and documents the multilayered challenges faced by an untested new regulatory agency in its efforts to transform the broken but lucrative business practices of the financial services industry Authors Kirsch and Squires raise the question of whether the consumer protection approach to financial services reform will succeed over the long term in light of political and business efforts to scuttle it Case studies of mortgage and automobile lending reforms highlight the key contextual and structural conditions that explain the CFPB s ability to transform financial service industry business models and practices Meltdown The Financial Crisis Consumer Protection and the Road Forward is essential reading for a wide audience including anyone involved in the provision of financial services staff of financial services and consumer protection regulatory agencies and fair lending and consumer protection advocates Its accessible presentation of financial information will also serve students and general readers

A Shipyard at War Ian Johnston, 2014-11-19 Although best known for large liners and capital ships between 1914 and the completion of the wartime programmes in 1920 the Clydebank shipyard of John Brown but unlike most shipyard photography Clydebank s collection has survived although relatively few of the images have ever been published For this book some 200 of the most telling were carefully selected and scanned to the highest standards depicting in unprecedented detail every aspect of the yard s output from the liner Aquitania in 1914 to the cruiser Enterprise completed in 1920 Although ships are the main focus of the book the photos also chronicle the impact of the war on working conditions in the yard and perhaps most noticeable in the introduction of women in large numbers to the workforce With lengthy and informative captions and an authoritative introduction by Ian Johnston this book is a vivid portrait of a lost industry at the height of its success

Local Officials and the Struggle to Transform Cities Claire Bénit-Gbaffou , 2024-02-27 Why are even progressive local authorities with the will to improve seldom able to change cities Why does it seem almost impossible to redress spatial inequalities deliver and maintain basic services elevate impoverished areas and protect the marginalised communities Why do municipalities in the Global South refuse to work with prevailing social informalities and resort instead to interventions that are known to displace and aggravate the very issues they aim to address Local Officials and the Struggle to Transform Cities analyses these challenges in South African cities where the brief post apartheid moment opened a window for progressive city government and made research into state practices both possible and necessary In debate with other progressive moments in large cities in Brazil the USA and India the book interrogates City officials practices It

considers the instruments they invent and negotiate to implement urban policies the agency they develop and the constraints they navigate in governing unequal cities This focus on actual officials practices is captured through first hand experience state ethnographies and engaged research These reveal day to day practice that question generalised explanations of state failure in complex urban societies as essential malevolence contextual weakness corruption and inefficiency It is hoped that opening the black box of the workings of state opens paths for the construction of progressive policies in contemporary cities

The ^AFirst Civil Right Naomi

Murakawa,2014-07-10 In The First Civil Right is a groundbreaking analysis of root of the conflicts that lie at the intersection of race and the legal system in America Naomi Murakawa inverts the conventional wisdom by arguing that the expansion of the federal carceral state a system that disproportionately imprisons blacks and Latinos was in fact rooted in the civil rights liberalism of the 1940s and early 1960s not in the period after

Revolt of the Rich David Gibbs,2024-06-18 Inequality in the United States has reached staggering proportions with a massive share of wealth held by the very richest How was such a dramatic shift in favor of a narrow elite possible in a democratic society David N Gibbs explores the forces that shaped the turn toward free market economics and wealth concentration and finds their roots in the 1970s He argues that the political transformations of this period resulted from a revolt of the rich whose defense of their class interests came at the expense of the American public Drawing on extensive archival research Gibbs examines how elites established broad coalitions that brought together business conservatives social traditionalists and militarists At the very top Richard Nixon s administration quietly urged corporate executives to fund conservative think tanks and seeded federal agencies with free market economists Even Jimmy Carter s ostensibly liberal administration brought deregulation to the financial sector along with the imposition of severe austerity measures that hurt the living standards of the working class Through a potent influence campaign academics and intellectuals sold laissez faire to policy makers and the public justifying choices to deregulate industry cut

social spending curb organized labor and offshore jobs alongside expanding military interventions overseas Shedding new light on the political alliances and policy decisions that tilted the playing field toward the ultrawealthy Revolt of the Rich unveils the origins of today's stark disparities Breaking Point Rebecca Schwartz Greene, 2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II Breaking Point is the first in depth history of American psychiatry in World War II Drawn from unpublished primary documents oral histories and the author's personal interviews and correspondence over years with key psychiatric and military policymakers it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations Ultimately 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds Never before or since has the United States engaged in such a program In designing Selective Service Medical Circular No 1 psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening's validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected *Aerospace Structural Metals Handbook* ,1989
