Architecture Owen Hopkins, 2012-02-20 This innovative and unique book is a visual guide to the buildings that surround us naming all the visible architectural features so that unlike other architectural dictionaries the reader doesn't have to know the name before looking it up Clear line drawings and extensive colour photographs illustrate each of the main building types from forts to churches stately homes to skyscrapers The individual structural elements and materials common to all buildings are then explained whether in Classical Gothic or Modernist style before delving into the inner architectural details such as doors and windows roofs and staircases A comprehensive glossary completes the book An original and accessible take on the architectural dictionary this book takes you on a visual tour of the buildings around us and will be useful not only to students but to anyone with a general interest in architecture *Canadian Architectural Styles* Don Mikel, 2025-10-07 Featuring over 1 100 photographs this guide identifies more than 40 important architectural styles in Canada ranging from the nineteenth century Georgian Gothic Revival and Italianate buildings to twentieth and twenty first century Art Deco Mid Century Modern Brutalist and Neo Expressionism The examples are drawn from all across Canada rural small town and urban Meticulously researched and extensively illustrated the book includes heritage homes cottages churches schools and buildings of government and commerce Each chapter provides an introduction to the style followed by carefully selected representative examples from across the country An index to buildings by town or region enables readers to identify and appreciate architectural styles in every part of Canada The result of more than a decade of research and photography this is the first comprehensive field guide to Canadian architectural styles *Architecture and Freedom* Owen Hopkins, 2018-05-29 Architects are facing a crisis of agency For decades they have seen their traditional role diminish in scope as more and more

of their responsibilities have been taken over by other disciplines within the building construction industry. Once upon a time we might have seen the architect as the conductor of the orchestra; now he or she is but one cog in a vast and increasingly complex machine. In an attempt to find a way out of this crisis, there is growing debate about how architects might reassert the importance of their role and influence. On one side of this argument are those who believe that architects must refocus their attention on the internal demands of the discipline. On the other are those who argue that architects must instead reacquaint themselves with what many still believe to be the discipline's core mission of advancing social progress and promoting the public good, and at the same time the scope of their traditional disciplinary remit. At root, this question is fundamentally about freedom: about whether architects still possess it if they have ever done, and whether it is possible to find the professional disciplinary and individual autonomy to be able to define the spheres of their own practice. Presenting a variety of views and perspectives, this issue of AD takes us to the heart of what freedom means for architecture as it adapts and evolves in response to the changing contexts in which it is practised in the 21st century. Contributors include Phillip Bernstein, Peggy Deamer, Adam Nathaniel Furman, Kate Goodwin, Charles Holland, Anna Minton, Patrik Schumacher, Alex Scott, Whitby Ines Weizman, and Sarah Wigglesworth. Featured architects: Atelier Kite, ScottWhitbyStudio, C S Architects, Anupama Kundoo, Noero Architects, Umbrellium, and Zaha Hadid Architects.

Cultural Influences on Architecture Koç, Gülşah, Claes, Marie-Therese, Christiansen, Bryan, 2016-10-19. A society's culture is a contributing factor to the structure and design of its architecture. As contemporary globalism brings about the evolution of the world, architectural style evolves along with it, which can be observed on an international scale. Cultural Influences on Architecture is a pivotal reference source for the latest research on the impact of culture on architecture through the aspects of planning and production and highlights the importance of communicative dimension in design. Featuring exhaustive coverage on a variety of relevant perspectives and topics such as the evolution of construction systems, benefits of nature-based architecture, and fundamentals of social capital, this publication is ideally designed for researchers, scholars, and students seeking current research on the connection between culture and architecture on a global level.

Visualizing the Street Pedram Dibazar, Judith Naeff, 2025-10-01. From user-generated images of streets to professional architectural renderings and from digital maps and drone footages to representations of invisible digital ecologies, this collection of essays analyses the emergent practices of visualizing the street. Today, advancements in digital technologies of the image have given rise to the production and dissemination of imagery of streets and urban realities in multiple forms. The ubiquitous presence of digital visualizations has in turn created new forms of urban practice and modes of spatial encounter. Everyone who carries a smartphone not only plays an increasingly significant role in the production, editing, and circulation of images of the street but also relies on those images to experience urban worlds and to navigate in them. Such entangled forms of image making and image sharing have constructed new imaginaries of the street and have had a significant impact on the ways in which contemporary and future streets are

understood imagined documented navigated mediated and visualized Visualizing the Street investigates the social and cultural significance of these new developments at the intersection of visual culture and urban space The interdisciplinary essays provide new concepts theories and research methods that combine close analyses of street images and imaginaries with the study of the practices of their production and circulation The book covers a wide range of visible and invisible geographies From Hong Kong s streets to Rio s favelas from Sydney s suburbs to London s street markets and from Damascus war torn streets to Istanbul s sidewalks and engages with multiple ways in which visualizations of the street function to document street protests and urban change to build imaginaries of urban communities and alternate worlds and to help navigate streetscapes Architectural Details Emily Cole,2014-09-15 Do you know a Doric column when you see one Of course But what about an entablature a hypostyle a pylon or a pagoda Architecture Styles uses beautifully engraved plates from the great works of architectural history to illustrate a show and tell journey round the architecture of civilizations east and west from Ancient Egypt to the Industrial Revolution Most of the drawings and engravings have been taken from early sources unparalleled for their elegance and delicacy of line as well as for the amount of fine detail they offer Extended captions and annotation supply you with a complete naming of parts which as well as identifying and defining the correct terminology will help you to understand how architects have planned and made the buildings of the past from Amenhotep to Palladio and Vitruvius to Wren The Oxford History of British and Irish Catholicism, Volume II John Morrill,Liam Temple,2023-09-01 The second volume of The Oxford History of British Irish Catholicism traces the fortunes of Catholic communities in England Wales Scotland and Ireland across a period of great uncertainty and change From the outset of the Civil Wars in 1641 to the Jacobite rising of 1745 Catholics in the three kingdoms were varied in their responses to tumultuous events and tantalising opportunities The competing forces of dynamism and conservatism within these communities saw them constantly seeking to re situate or re imagine themselves as their relationship to the state to Protestantism to continental Europe as well as the wider world beyond changed and evolved Consciously transnational the volume moves away from insular conceptualisations of Catholicism and instead stresses connections with the European continent and beyond Early chapters give broad overviews of the experience of Catholics in the period tracking key events and important developments from 1641 to 1745 Chapters then address specific aspects of Catholicism including empire and overseas missions missionary activity devotion spirituality trade material culture music and architecture among others revealing a complex rich and varied history of Catholicism in the period *Libraries of Light* Alistair Black,2016-10-04 For the first hundred years or so of their history public libraries in Britain were built in an array of revivalist architectural styles This backward looking tradition was decisively broken in the 1960s as many new libraries were erected up and down the country In this new Routledge book Alistair Black argues that the architectural modernism of the post war years was symptomatic of the age s spirit of renewal In the 1960s public libraries truly became libraries of light and Black further

explains how this phrase not only describes the shining new library designs with their open plan decluttered Scandinavian inspired designs but also serves as a metaphor for the public library's role as a beacon of social egalitarianism and cultural universalism. A sequel to *Books Buildings and Social Engineering* 2009 Black's new book takes his fascinating story of the design of British public libraries into the era of architectural modernism. Motherly Rebekah Pryor, 2022-01-31 How can contemporary art reimagine the body of the mother in relation to a feminist Christian conception of the divine? And at the level of culture, what might be the implications of the maternal body imaged as ordinary, multiple, generative and divine? Following movements in her own visual art practice and traversing the discourses of feminist theory, contemporary art and philosophy of religion, artist and scholar Rebekah Pryor considers philosopher Luce Irigaray's key notions of sexual difference, the sensible, the transcendental and love at work in thinking on the way to proposing alternate artistic and theological motifs of the maternal body and the divine for our time. Five new motifs emerge, challenging iconographic conventions and proposing an expanded vision of the mother and the divine in feminist theology and contemporary art. *Proceedings of the 4th Biennial of Architectural and Urban Restoration. Host of the Itinerant Congress Hidden Cultural Heritage: Under Water, Under Ground and Within Buildings*, 2018-09-02 The Biennial of Architectural and Urban Restoration is composed by a series of cultural events like seminars, shows, art exhibitions, projections of documentaries, debates, visits, all open and also aimed to the public. The purpose of these activities is to bring out the architectural and urban local heritage and raise public awareness to its protection, creating an international forum of discussion between countries with similar problems but various economic and socio-political situations. **Reading Architecture Second Edition** Owen Hopkins, 2023-01-26 Anyone with an interest in buildings and the built environment would do well to purchase a copy of Owen Hopkins' book *Monocle*. This innovative and unique book is a visual guide to the buildings that surround us. Architectural features are pinpointed and labelled on images of buildings so that unlike with other architectural dictionaries you don't have to know the name before looking it up. Clear line drawings and extensive colour photographs illustrate each of the main building types from forts to churches, stately homes to skyscrapers. The individual structural elements and materials common to all buildings are then explained, whether in Classical, Gothic or Modernist style. A comprehensive glossary completes the book. This revised edition includes an expanded section on modern structures and materials as well as the latest styles and concepts from the last ten years. A must for all lovers of architecture and those who would like to learn more. Over 11,000 copies sold in English worldwide. Covers all key building types and styles from cathedrals to skyscrapers. Classical to contemporary. Each building type is illustrated with extensive photographs and annotated drawings. Contains a comprehensive glossary of architectural terms. Audio-visual Guide, 1951.
