Artificial Intelligence of Things (AIoT) Kashif Naseer

Qureshi,Thomas Newe,2024-04-05 This book is devoted to the new standards technologies and communication systems for Artificial Intelligence of Things AIoT networks Smart and intelligent communication networks have gained significant attention due to the combination of AI and IoT networks to improve human and machine interfaces and enhance data processing and services AIoT networks involve the collection of data from several devices and sensor nodes in the environment AI can enhance these networks to make them faster greener smarter and safer Computer vision language processing and speech recognition are some examples of AIoT networks Due to a large number of devices in today s world efficient and intelligent data processing is essential for problem solving and decision making AI multiplies the value of these networks and promotes intelligence and learning capabilities especially in homes offices and cities However several challenges have been observed in deploying AIoT networks such as scalability complexity accuracy and robustness In addition these networks are integrated with cloud 5G networks and blockchain methods for service provision Many different solutions have been proposed to address issues related to machine and deep learning methods ontology based approaches genetic algorithms and fuzzy based systems This book aims to contribute to the state of the art and present current standards technologies and approaches for AIoT networks This book focuses on existing solutions in AIoT network technologies

applications services standards architectures and security provisions This book also introduces some new architectures and models for AIoT networks **Banana Peels Valorization** Mejdi Jeguirim, Besma Khiari, 2024-05-21 Banana Peels

Valorization Sustainable and Eco friendly Applications provides a global overview of world production physicochemical and microbiological characteristics of Banana Peels and the various pathways for their valorization considering the advantages disadvantages and factors impacting on each way of valorization Each chapter deals with sustainable applications based on the sector category Such structure helps the audience from a specific field to easily identify the specific application

Successful case study of a banana processing by products valorization is also presented Written by a team of interdisciplinary experts this is the ultimate valuable resource for agricultural or food engineers who work in the banana groves and in the banana processing industry and also for Researchers working in correlated areas of food environmental and energy fields

Provides a global overview of world production physicochemical and microbiological characteristics of banana peels Explores banana tree and fruit wastes including their quantification and classification Discusses each sustainable application of banana peels in a specific chapter based on the sector category

Ozone Pollution and Plant Health: Understanding the Impacts and Solutions for Sustainable Agriculture, 2023-06-05 Advances in Botanical Research Volume 108 Ozone Pollution and Plant Health Understanding the Impacts and Solutions for Sustainable Agriculture provides a comprehensive overview of the harmful effects of tropospheric ozone O₃ pollution on crop productivity with a focus on how it is measured and modeled under climate change scenarios The book discusses the sources of O₃ pollution including anthropogenic precursor gases and how O₃ exposure can impair photosynthesis reduce gas exchange induce early leaf senescence and hamper growth in natural vegetation and crops The book highlights how O₃ interacts with plant physiology and metabolism including through the activation of signal transduction pathways changes in phytohormone signaling and modulation of reactive oxygen species ROS generation and signaling The book also explores the experimental and modeling methods used to assess the effects of O₃ on crops with a focus on studies conducted in Asia The book emphasizes the importance of understanding the implications of ozone pollution for ensuring food security and protecting human and environmental health and suggests strategies such as using ozone resistant cultivars of plants and crops Additionally the book discusses the broader context of air pollution and its impact on crop productivity including the effects of other air pollutants on plants and crops and the need for mitigation strategies and policies to address agricultural losses This book is essential reading for early career researchers sustainable agriculture practitioners and policymakers interested in understanding the complex interactions between ozone pollution and plant productivity and finding solutions to mitigate the detrimental effects of ozone pollution on crops in a changing climate Discusses the impact of O₃ pollution on plant productivity and the methods for measuring and modeling this under climate change scenarios Reviews recent findings about the target sites for O₃ in plants O₃ induced stomatal regulation by phytohormone signaling and plants responses related to phytohormone biosynthesis ROS

generation and signaling in exposure to O₃ Provides an overview of ozone air quality ozone effects on plant and crop and experimental and modeling methods used to assess the effects It focuses on the results of the experimental and modeling studies of the ozone effects on agricultural crops in Asia Covers the effects of common air pollutants on crops and their pathways of exposure to plants It also discusses the disturbance in the biochemistry of plants and their metabolisms due to air pollution and some laws implemented for air pollution control in Pakistan **The Indian Mineralogist**, 2009
