## **Asian Maritime Strategies Navigating Troubled Waters:**

**Asian Maritime Strategies** Bernard D Cole, 2013-10-15 This book is concerned with both the national security concerns of Asian maritime nations and the security of the Asian maritime commons These are defined as the Pacific and Indian Oceans and associated seas bays and gulfs with their included sea lines of communication SLOCs The most useful geographical designation for maritime Asia is the Indo Pacific Bernard Cole provides both a survey of the maritime strategies of the primary nations of the Indo Pacific region and an evaluation of the domestic and international politics that drive those strategies The United States Canada Russia Japan North Korea South Korea China the Philippines Brunei Indonesia Vietnam Singapore Malaysia Myanmar India Pakistan Iran the smaller Indian Ocean and Persian Gulf states are all surveyed and analyzed The United States Japan China and India not surprisingly draw the most attention given their large modern navies and distant strategic reach The author concludes that the United States remains the dominant maritime power in this huge region stretching from Canada to the Persian Gulf despite its lack of a traditionally strong merchant marine U S maritime power remains paramount due primarily to its dominant navy The Chinese naval modernization program deservedly receives a good deal of public attention but Cole argues that on a day to day basis the Japanese Maritime Self Defense Force as its navy is named is the most powerful maritime force in Far Eastern waters while the modernizing Indian Navy potentially dominates the Indian Ocean In fact a focus of this work is the exemplary description of all the region's navies with the author noting the naval arms race that is underway particularly in the area of submarine acquisition Cole is careful to couch this phenomenon in the regional concerns about Chinese naval expansion and the desire to ensure a continued massive U S naval presence The current naval developments in the region evince elements of a naval arms race but lack the coherent maritime strategies to make naval developments dangerous to regional peace and security Most telling will be whether United States power and focus remain on the region while adjusting to continued Chinese maritime power in a way acceptable to both nations No other current or recent work provides such a complete description of the Indo Pacific region's navies and maritime strategies while analyzing the current and future impact of those forces [The United States Navy's Pivot to Asia](#)

Bruce A. Elleman, 2023-06-30 This book examines the origins of the US Navy's 2007 Maritime Strategy the formation of the US government's Pivot to Asia strategy and the most recent revisions to this strategy that focus more specifically on China Besides examining the details of this strategy formulation the book explores the internal and external repercussions on the US Navy of the Pivot to Asia It discusses the Fat Leonard scandal which involved bribery and corruption in contracts for the maintenance of the US fleets in the region and considers the sharp decrease in training and readiness of the Pacific fleet to support the pivot which in turn led to serious maritime collisions It also assesses the impact of the pivot on other countries in the region engaging in the debate as to whether the pivot was necessary in order to convince the countries of the region that the United States had not lost its staying power or whether the pivot managed to make tensions in the Asia Pacific worse

even while allowing the strategic situation in the Middle East and Europe to worsen as a result of neglect      **Assessing Maritime Power in the Asia-Pacific** Greg Kennedy, Harsh V. Pant, 2016-03-09 Leading academics from around the world who specialize in analysing maritime strategic issues deliberate the impact of the American pivot or re balance strategy and the Air Sea Battle operational concept on the maritime power and posture of a number of selected states Intending to strengthen US economic diplomatic and security engagement throughout the Asia Pacific both bilaterally and multilaterally the re balance stands out as one of the Obama administration s most far sighted and ambitious foreign policy initiatives

**The New Age of Naval Power in the Indo-Pacific** Catherine L. Grant, Alessio Patalano, James A. Russell, 2023 Competition at sea is back as a central issue of international security Today the US led maritime order and the freedom to use the ocean as a vast maneuver space to access different markets and theaters stands contested Nowhere is the urgency to address state on state competition at sea more strongly felt than in the Indo Pacific region where freedom of navigation stands challenged by regional states continuous investments in naval power and the renewed political will to use it The international groups of distinguished contributors to this volume survey and analyze the implications of the return of naval power as a critical consideration of international relations in the Indo Pacific region Catherine L Grant Alessio Patalano and James A Russell develop an original framework in which five factors of influence help explain how and why naval power matters in this pivotal part of the world for cooperation coercion and competition The chapters also provide historical background outline key issues and conduct a close examination of key subregions This book will be read by both academics and policy makers alike seeking to navigate the complexity of maritime security and regional affairs      *To Rule Eurasia's Waves* Geoffrey F. Gresh, 2020-10-27 The first book to weave Eurasia together through the perspective of the oceans and seas Eurasia s emerging powers India China and Russia have increasingly embraced their maritime geographies as they have expanded and strengthened their economies military capabilities and global influence Maritime Eurasia a region that facilitates international commerce and contains some of the world s most strategic maritime chokepoints has already caused a shift in the global political economy and challenged the dominance of the Atlantic world and the United States Climate change is set to further affect global politics With meticulous and comprehensive field research Geoffrey Gresh considers how the melting of the Arctic ice cap will create new shipping lanes and exacerbate a contest for the control of Arctic natural resources He explores as well the strategic maritime shifts under way from Europe to the Indian Ocean and Pacific Asia The race for great power status and the earth s changing landscape Gresh shows are rapidly transforming Eurasia and thus creating a new world order      *Continental Powers and Naval Development* Brian C. Chao, 2025-10-16 This book examines how continental great powers have attempted to develop and wield strong navies since 1801 Continental Powers and Naval Development argues that a continental great power s ability to build and effectively use a strong navy is greatly affected by two factors a naval force design capable of executing national strategy strategy coherence and the deployment of that navy

to places or for purposes that minimize the dominant naval power's threat perception threat diffusion Each factor is deceptively difficult for a continental great power to achieve but through an analysis of four historical case studies this book shows how both factors are vital not just for successful naval development but for keeping the peace among great powers Finally it highlights how states commonly thought of as unnatural naval powers can nonetheless achieve their political objectives at sea This book will be of much interest to students of naval history maritime strategy and International Relations

Parameters, 2015      *Understanding Modern Warfare* David Jordan, James D. Kiras, David J. Lonsdale, Ian

Speller, Christopher Tuck, C. Dale Walton, 2016-07-14 A fully revised and updated new edition of this leading introduction to the theory and conduct of warfare in the twentieth and twenty first centuries The book combines analysis of key concepts theory and military doctrine with reference to relevant examples from history and integrates the land sea and air

environments      **Power and the Maritime Domain** Greg Kennedy, William de Sousa Moreira, 2022-10-28 This book offers a multi disciplinary and multi national approach to defining key elements required to define power within the maritime domain The volume engages with the concept that the maritime domain is a multi dimensional space embracing oceans seas waterways including all elements of maritime power related activities infrastructure resources and assets It illustrates the complexity and interconnectivity of the factors that contribute to the appreciation creation and application of maritime power In practical terms the book highlights that the maritime domain is a continuum that interconnects countries cultures politics economics trade environment knowledge and technological power globally Perhaps most importantly the maritime domain generates power of its own volition as well as acting as a critical enabler for the creation of other types of nations power economic political military technological intelligence and fiscal power in particular The book not only brings those various factors to the reader's attention but in the synthesis also clarifies the connections between the various elements in creating a greater maritime whole This book will be of great interest to students of maritime security strategic studies and International Relations

**Routledge Handbook of Naval Strategy and Security** Joachim Krause, Sebastian Bruns, 2016-03-17 This new handbook provides a comprehensive overview of the issues facing naval strategy and security in the twenty first century Featuring contributions from some of the world's premier researchers and practitioners in the field of naval strategy and security this handbook covers naval security issues in diverse regions of the world from the Indian Ocean and the Mediterranean to the Arctic and the piracy prone waters off East Africa's coast It outlines major policy challenges arising from competing claims transnational organized crime and maritime terrorism and details national and alliance reactions to these problems While this volume provides detailed analyses on operational judicial and legislative consequences that contemporary maritime security threats pose it also places a specific emphasis on naval strategy With a public very much focused on the softer constabulary roles naval forces play such as humanitarian assistance disaster relief naval diplomacy maintenance of good order at sea the overarching hard power role of navies has been pushed into the background In fact

navies and seapower have been notably absent from many recent academic discussions and deliberations of maritime security This handbook provides a much desired addition to the literature for researchers and analysts in the social sciences on the relationship between security policy and military means on land and from the sea It comprehensively explains the state of naval security in this maritime century and the role of naval forces in it This book will be of much interest to students of naval security and naval strategy security studies and IR as well as practitioners in the field *Needs and Opportunities in the Modern History of the U.S. Navy* Michael J. Crawford, 2018 This is a compilation of a series of papers presented in conjunction with a year long lecture series sponsored by the Naval History and Heritage Command Provided by publisher

*Journal of the International Relations and Affairs Group, Volume V, Issue I* Daniel Evans, 2015-07-19 The International Relations and Affairs Group supports research in foreign affairs and global issues among states within the international system including the roles of states inter governmental organizations IGOs non governmental organizations NGOs and multinational corporations MNCs We focus on geopolitical analysis globalization and international policy issues and apply qualitative and quantitative analysis Our focus is analyzing as well as formulating solutions to issues with foreign policy cultural interaction crisis and other We have a network of over 65 500 members globally JIRAG welcomes submissions on the following topics Geopolitical Analysis Homeland Security National Security Globalization Conflict Resolution Commerce Law Diplomacy Intelligence Community Negotiation Government Defense Warfare Business Public Policy Terrorism Crime Economic Trade NGO s MNC s Disaster Culture Human Trafficking and other related topics **Naval Constabulary**

**Operations and Fisheries Governance** Sean A. G. Andrews, 2024-05-07 This book offers an analysis of naval constabulary operations in particular Australian fisheries patrols and challenges the widely accepted Anglo American school of maritime thought In the Indo Pacific fisheries and the activities of fishing boats are of increasing strategic importance in Australia s region Australia s Four Oceans Issues of overfishing population growth and climate change are placing growing pressure on fish as a resource and in doing so are making fisheries more significant and significant on a strategic as opposed to simply an economic or environmental level When combined with the growing use of fishing vessels as para naval forces it is clear that the activities of fishing vessels whether fishing or not fishing are matters of considerable strategic relevance This book illuminates contemporary seapower challenges explains and defines maritime security and examines and refines existing theory to advance a set of new or refined concepts to help frame the on water activities of constabulary operations reducing the possibility of on water miscalculation between states This book will be of much interest to students and scholars of naval studies and sea power maritime strategy maritime security and International Relations Security in the Global Commons and Beyond J. Martín Ramírez, Bartolomé Bauzá-Abril, 2021-04-10 This book deals with two areas Global Commons and Security inextricably melted together and more relevant than ever in a world which is ever globalized and with an incognita looming on the horizon the effects of the Coronavirus pandemic upon the International Relations and globalization Global

Commons have always been relevant It was Mahan who argued that the first and most obvious light in which the sea presents itself from the political and social point of view is that of a great highway or better perhaps of a wide common Nowadays this view has been further developed and in addition to the unique legal implications that the Global Commons introduce they are viewed more and more intently as a common pool of resources Or perhaps not that common Resources the key word Which has to be always supplemented by two key words access and security And still another one data the cyberspace contribution to the equation *China's Evolving Surface Fleet* Peter Dutton,Ryan D. Martinson,2017 Over the past fifteen years the People s Liberation Army Navy s PLAN s missile fast attack craft and amphibious fleets have been significantly modernized While these two types of vessels have not increased in numbers their capabilities have increased exponentially This publication examines the People s Liberation Army s PLA s doctrine and training strategy in order to analyze present and predict future missions by these military vessels China s deterrence posture is improved greatly by these ships and boats which aid coastal water defense and threaten Taiwanese attempts to gain independence In addition these two fleets improve China s long range sealift capabilities and help with the PLA s traditional and new nontraditional security practices These fleets allow the PLAN to continue offshore operations and begin blue water or far seas operations helping the United States to predict the future nature of Chinese maritime missions Related items China collection of publications can be found here <https://bookstore.gpo.gov/catalog/china> Chinese Military Reforms in the Age of Xi Jinping Drivers Challenges and Implications can be found here <https://bookstore.gpo.gov/products/chinese-military-reforms-age-xi-jinping-drivers-challenges-and-implications> Indian and Chinese Engagement in Latin America and the Caribbean A Comparative Assessment can be found here <https://bookstore.gpo.gov/products/indian-and-chinese-engagement-latin-america-and-caribbean> U S Landpower in the South China Sea can be found here <https://bookstore.gpo.gov/products/us-landpower-south-china-sea> **U.S. Naval Institute Proceedings** United States Naval Institute,2015 **The Chinese People's Liberation Army in 2025** Roy Kamphausen,David Lai,Army War College (U.S.). Strategic Studies Institute,2015 This updated volume is of special relevance in light of the profound changes occurring within the Chinese People s Liberation Army PLA China s desire to develop a military commensurate with its diverse interests is both legitimate and understandable The challenge for U S Pacific Command USPACOM is to understand how China will employ this growing military capability in support of its interests The book addresses the uncertainty surrounding the potential direction of the PLA by examining three distinct focus areas domestic external and technological drivers of PLA modernization alternative futures for the PLA and Implications for the region world and U S China relations The analysis provides an insightful perspective into the factors shaping and propelling the PLA s modernization its potential future orientation ranging from internally focused to globally focused and how the PLA s choices may impact China s relations with its neighbors and the world Audience Military personnel policy analysts lawmakers and foreign officers in the Asia Pacific region may find many insights in this book pertaining to the development

of the Chinese People's Liberation Army under the leadership of Chinese President Xi Jinping High school community college and undergraduate university students pursuing coursework and research for United States 1945 Present global studies and world history classes may find this text helpful for classroom debates about the expansion of the Chinese military role Graduate students may find this work helpful for International Relations Chinese Studies and Global Affairs coursework in the pursuit of a Master's Degree program in these areas China resources collection can be found here <https://bookstore.gpo.gov/catalog/international/foreign-affairs/asia/china> Indian Foreign Policy and the Border Dispute with China Willem van Eekelen, 2015-11-02 This volume is an updated and expanded version of the author's original book first published by Martinus Nijhoff Publishers and based on his cum laude doctoral dissertation That volume discussed how the Five Principles of Peaceful Coexistence drowned in the first war between a communist and a non-aligned state This new edition reproduces the original text but supplements it considerably in light of subsequent developments and official records and reports only later released or leaked to the public It places Sino-Indian relations in the wider current context of the rise of China the position of Tibet and the disorganised state of Asia The border dispute did not prevent substantial economic relations developing between the two countries and visits taking place at the highest political level But it still gives rise to almost daily incursions and in the current climate the risk of a clash is growing as forces have been strengthened and most of the Line of Actual Control has not been demarcated This thought provoking volume sheds light on what is still a complex and uneasy relationship Eurasia's Maritime Rise and Global Security Geoffrey F. Gresh, 2018-04-04 This book explores Eurasia's growing embrace of its maritime geography from the Indian Ocean to Pacific Asia and the Arctic In an age of climate change the melting of the Arctic will transform Eurasia's importance in addition to influencing the political economic and military dynamics across Eurasia's main maritime regions These emerging shifts have already begun to alter maritime trade and investment patterns and thus the global political economy It also creates a rising threat to the current status quo of world order that has long been dominated by the Atlantic World This edited volume showcases some of the world's leading experts and examines Eurasia from a saltwater perspective analyzing its main maritime spaces in a threefold manner as avenue as arena as source to show the significance of this geostrategic change and why it matters for the future of the world's oceans

**How to Grow a Navy** Geoffrey Till, 2022-09-02 This book examines the large but neglected topic of the development of maritime power from both an historical and a contemporary point of view Navies have never been more important than they are now in a century becoming as widely expected increasingly and profoundly maritime The growing competition between China and Russia with the United States and its allies and partners around the world is essentially sea based The sea is also central to the world's globalised trading system and to its environmental health Most current crises are either sea based or have a critical maritime element to them What happens at sea will help shape our future Against that background this book uses both history and contemporary events to analyse how maritime power and naval strength has been and is being

developed In a reader friendly way it seeks to show what has worked and what has not and to uncover the recurring patterns in maritime and naval development which explain past present and future success and failure It reflects on the historical experience of all navies but in particular it poses the question of whether China is following the same pattern of naval development illustrated by Britain at the start of the 18th century which led to two centuries of naval dominance This book will be of much interest to students of maritime power naval studies and strategic studies as well as to naval professionals around the world
