Asian Medical Systems Charles M. Leslie, 1977-01-01 Asian Medical Systems Charles M. Leslie, 1998 Asian Medical Systems provide fascinating opportunities to observe directly practices that continue ancient scientific modes of thought and to analyse the historical processes that mediate their relationship to modern science and technology Three great traditions of medical science evolved during antiquity in the Chinese Indian and Mediterranean civilizations all based on humoral conceptions of health and illness Folk curers throughout the world continue to practice humoral medicine but in Asia along educated physicians maintain its learned traditions Thus in these societies the great and little traditions of humoral medicine coexist with cosmopolitan medicine which draws upon modern science and modes of professional organization This volume has been designed to show how research on Asian medicine opens a new field of scholarship the comparative study of medical systems Such a book requires the skills of authors with many kinds of training and those who have contributed essays to this volume are trained in history sociology anthropology public health pharmacology epidemiology cosmopolitan medicine and philosophy *Asian Medical Systems* Charles Leslie, 2022-07-15 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1976 **Asian Medical Systems** Charles Leslie, 2023-11-15 *Asian Medical Systems A Comparative Study* explores the enduring relevance and evolution of traditional medical practices in Asia emphasizing their interplay with modern cosmopolitan medicine The book examines three major medical traditions Chinese South Asian Ayurveda and Mediterranean Yunani that developed independently yet share foundational principles such as humoral theories of balance and equilibrium These systems formalized between the fifth century B C and the fifth century A D established authoritative texts professional standards and ethical codes that continue to influence contemporary practices Despite the dominance of cosmopolitan medicine rooted in scientific advancements like germ theory and modern surgery traditional medicine in many Asian countries coexists with modern approaches supported by educational institutions research bodies and professional organizations This pluralism is particularly evident in nations like China and India where both systems are often integrated into healthcare delivery The book highlights the pluralistic and adaptive nature of Asian medical systems which provide insights into how traditional and modern practices complement each other It challenges the perception of cosmopolitan medicine as uniquely scientific arguing that Chinese Ayurvedic and Yunani systems also exhibit rational systematic methods grounded in empirical observation and theory By framing cosmopolitan medicine as transcultural rather than exclusively Western the study underscores its global integration while recognizing the cultural ecological and social dimensions of health in Asia Through multidisciplinary analysis the work illuminates how medical systems evolve and intersect offering a nuanced perspective on

their coexistence and their potential for addressing contemporary health needs This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1976 Plural Medical Systems In The Horn Of Africa: The Legacy Of Sheikh Hippocrates Leendert Jan Slikkerveer,2013-10-28 First Published in 1990 This study is an important landmark in our understanding of the complexities of pluralistic medical systems It is an unusual study as it provides an overview of the indigenous Oromo and Amhara the regional Greco Arabic and the cosmopolitan health systems in the Horn of Africa using a variety of approaches and methodologies

Decolonizing Science and Modernity in South Asia Sahara Ahmed,Suvobrata Sarkar,2024-09-19 This book offers a unique perspective on the colonial roots of modern science technology and medicine STM in South Asia The book questions the deconstruction of imperial visions and definitions of science and modernity in South Asia It presents an in depth analysis of the contested relationship between science modernity and colonialism It explores how new research can contribute to the diversification of perspectives in the history and sociology of modern South Asian studies The chapters in the book delve into various aspects of STM in South Asia It covers diverse topics including the social cultural and pedagogic context of early modern Bengal the popularization of science in colonial Punjab the Hindi science periodical Vigyan and the emergence of the Indian science community The book also examines the intersection of indigenous medical practices ayurveda Unani and medical revivalism and highlights peripheral creativity in science The contributors engage with the existing historiography to raise new questions concerning the global circulations of scientific knowledge from the perspective of South Asia and the regional appropriation of the same It connects the history of science and modernity with South Asia s socio economic and cultural background It offers valuable insights into the decolonization of STM It greatly interests scholars and students of modern South Asian history sociology social anthropology and Science Technology and Society Studies STS

the senses work With contributions from an international team of experts Everyday Life in Asia will be of interest to anthropologists geographers and sociologists with interests in culture everyday life and their relation to the senses of place and space **The Development of Modern Medicine in Non-Western Countries** Hormoz Ebrahimnejad,2009-01-13

This book for the first time bridges the gap in medical history between modern Western and non Western medicines It opens a new perspective in medical historiography in which modern medicine becomes an integral part of the history of medicine in non European countries **Medicine and Morality in Haiti** Paul Brodwin,1996-09-13

Morality and medicine are inextricably intertwined in rural Haiti and both are shaped by the different local religious traditions Christian and Vodoun as well as by biomedical and folk medical practices When people fall ill they seek treatment not only from Western doctors but also from herbalists religious healers and midwives Dr Brodwin examines the situational logic the pragmatic decisions that guide people in making choices when they are faced with illness He also explains the moral issues that arise in a society where suffering is associated with guilt but where different sometimes conflicting ethical systems coexist Moreover he shows how in the crisis of illness people rework religious identities and are forced to address fundamental social and political problems

Modern and Global Ayurveda Dagmar Wujastyk,Frederick M. Smith,2013-09-09 Modern and Global Ayurveda provides an overview of the relatively recent history of Ayurveda in its modern and globalized forms One of the traditional medical systems originating on the Indian subcontinent Ayurveda is fast becoming a transnational phenomenon Contributors to this volume include both scholars and practitioners of Ayurveda The wide range of perspectives they offer include the philosophical anthropological sociopolitical economic biomedical and pharmacological Issues such as the ideological clashes between classical and modernized Ayurveda the export of Ayurvedic medical lore to Western countries and the possible reimport of its adapted and reinterpreted contents are covered and prove particularly relevant to contemporary discussion on the integration of complementary and alternative health care **Studies on Indian Medical History** Gerrit Jan

Meulenbeld,D. Wujastyk,2001 This volume of studies presents the papers given at the second workshop of the European Ayurdic society a group which was formed in Groningen in 1983 The volume is thus a sequel to Proceedings of the international workshop on priorities in the study of Indian medicine The workshop was held over a period of three days in September 1985 in the congenial surroundings of the Wellcome Institute for the History of Medicine in London and it provided a splendid opportunity for scholars in the field of Indian medical history to meet in one place and to share the latest research in their respective areas *Warm Climates and Western Medicine* ,2020-01-29

It is generally assumed that tropical medicine only emerged as a medical specialism in the late nineteenth century under the aegis of men like Patrick Manson and Ronald Ross However recent research much of it brought together for the first time in this volume shows that a distinctive medicine of warm climates came into existence much earlier in areas like the West Indies Indonesia and India Europeans health needs were one imperative but this was more than just the medicine of Europe shipped overseas Contact

with non Western medical ideas and practices was also a stimulus as was Europe's encounter with unfamiliar environments and peoples. These essays provide valuable insights into the early history of tropical medicine and from the standpoint of several European powers. They examine the kinds of medicine practised, the responses to local diseases and environments and diseases, the nature of the medical constituencies that developed and the relationship between the old medicine of warm climates and the emerging tropical medicine of the late nineteenth century. The volume as a whole expands the parameters for the discussion of the evolution of Western medicine and opens up new perspectives on European science and society overseas.

Medicine Across Cultures Helaine Selin, 2006-04-11 This work deals with the medical knowledge and beliefs of cultures outside of the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal, Australian, Indian, Egyptian and Tibetan medicine, the book includes essays on comparing Chinese and western medicine and religion and medicine. Each essay is well illustrated and contains an extensive bibliography.

Plural Medicine, Tradition and Modernity, 1800-2000 Waltraud Ernst, 2002-11-01 Research into colonial or imperial medicine has made considerable progress in recent years whilst the study of what is usually referred to as indigenous or folk medicine in colonized societies has received much less attention. This book redresses the balance by bringing together current critical research into medical pluralism during the last two centuries. It includes a rich selection of historical, anthropological and sociological case studies that cover many different parts of the globe ranging from New Zealand to Africa, China, South Asia, Europe and the USA.

Diversity and Division in Medicine Anne Digby, 2006 This is an innovative investigation of pluralism in health care. Using both extensive archival material and oral histories, it examines relationships between indigenous healing, missionary medicine and western biomedicine. The book includes the different regions within South Africa, although focusing in most detail on the Cape, the earliest area of white settlement. In a wide ranging survey, the division in medicine between western and indigenous medicine is analysed through an exploration of the evolving practices of healers, missionaries, doctors and nurses. The book considers the extent to which there was a strategic crossing of boundaries in the construction of hybrid practices by these practitioners and the extent to which patients pursued health by sampling diverse care options. Starting with missionary penetration during the early nineteenth century, the volume outlines interventions by the colonial state in medicine and public health and the continued resilience of indigenous healing in the face of this. The book ends by relating past to present in scrutinising the legacy of historical structures including those of the apartheid state for current health care and in briefly discussing the huge challenges that the HIV/Aids pandemic poses in impacting on them. The book thus provides an inclusive history of medicine for the New South Africa.

A History of Medicine: Byzantine and Islamic medicine Plinio Prioreschi, 1996

Health Policy in Britain's Model Colony Margaret Jones, 2004 Was Western medicine a positive benefit of colonialism or one of its agents of oppression? This question has prompted a vigorous historical and political debate and is explored here in the context of the model British colony of Ceylon. In this study, Margaret Jones

emphasises the need for both a broad perspective and a more complex analysis Colonial medicine is critiqued not merely in the political and economic context of imperialism but also against the background of human needs and rights Her research is underscored by a detailed analysis of public health measures and services in Ceylon One of its key findings is the accommodation achieved between Western and indigenous medicine Throughout this work Jones provides nuanced readings of the categories of colonised and coloniser as well as the concept of colonial medicine Health Policy in Britain's Model Colony provides an understanding of historical trends while simultaneously avoiding generalisations that subsume events and actions Written in a compelling and lucid style it is a path breaking contribution to the history of medicine
