Public Health Behind Bars Robert Greifinger, 2007-10-04 Projecting correctional facility-based health care into the community arena, *Public Health Behind Bars: From Prisons to Communities* examines the burden of illness in the growing prison population and analyzes the considerable impact on public health as prisoners are released. More than forty practitioners, researchers and scholars in correctional health, mental health, law and public policy make a timely case for correctional health care that is humane for those incarcerated and beneficial to the communities they reenter. These authors offer affirmative recommendations toward that evolutionary step. Chapter authors identify the most compelling health problems behind bars, including communicable disease, mental illness, addiction and suicide; pinpoint systemic barriers to care; and explain how correctional medicine can shift from emergency or crisis care to primary care and prevention. In addition, strategies are outlined that link community health resources to correctional facilities so that prisoners can transition to the community without unnecessarily taxing public resources or falling through the cracks. Between the authors' research findings and practical suggestions, readers will find realistic answers to these and similar questions: Can transmission of HIV, tuberculosis and other communicable diseases be reduced and prevented among prisoners? How can correctional facilities treat addiction more effectively? What can be done to improve diagnosis and treatment of psychiatric disorders? Can

correctional care benefit from quality management and performance measurement How can care be coordinated between correctional and community health care providers What are the health risks to communities if action is not taken Public Health Behind Bars From Prisons to Communities is a challenge of immediate interest to readers in correctional health and medicine public and community health health care administration and policy and civil rights *Lethal Violence* Harold V.
