## **Assessing War The Challenge Of Measuring Success And Failure:**

Assessing War Leo J. Blanken, Hy Rothstein, Jason J. Lepore, 2015-12-15 Today's protracted asymmetrical conflicts confuse efforts to measure progress often inviting politics and wishful thinking to replace objective evaluation In *Assessing War* military historians social scientists and military officers explore how observers have analyzed the trajectory of war in American conflicts from the Seven Years War through the war in Afghanistan Drawing on decades of acquired expertise the contributors examine wartime assessment in both theory and practice and through alternative dimensions of assessment such as justice and proportionality the war of ideas and economics This group of distinguished authors grapples with both conventional and irregular wars and emerging aspects of conflict such as cyberwar and nation building that add to the complexities of the modern threat environment The volume ends with recommendations for practitioners on best approaches while offering sobering conclusions about the challenges of assessing war without politicization or self delusion Covering conflicts from the eighteenth century to today *Assessing War* blends focused advice and a uniquely broad set of case studies to ponder vital questions about warfare's past and its future The book includes a foreword by Gen George W Casey Jr USA Ret former chief of staff of the US Army and former commander Multi National Force Iraq

**Assessing War** Leo James Blanken, Hy S. Rothstein, Jason J. Lepore, 2015 *Assessing War* spans two centuries of US military history to examine the challenge of measuring progress in wartime Expert contributors examine wartime assessment in both theory and practice and through alternative dimensions of assessment such as justice and proportionality the war of ideas and economics

**The Commander-in-Chief Test** Jeffrey A. Friedman, 2023-12-15 In *The Commander in Chief Test* Jeffrey A Friedman offers a fresh explanation for why Americans are often frustrated by the cost and scope of US foreign policy and how we can fix that for the future Americans frequently criticize US foreign policy for being overly costly and excessively militaristic With its rising defense budgets and

open ended forever wars US foreign policy often appears disconnected from public opinion reflecting the views of elites and special interests rather than the attitudes of ordinary citizens The Commander in Chief Test argues that this conventional wisdom underestimates the role public opinion plays in shaping foreign policy Voters may prefer to elect leaders who share their policy views but they prioritize selecting presidents who seem to have the right personal attributes to be an effective commander in chief Leaders then use hawkish foreign policies as tools for showing that they are tough enough to defend America s interests on the international stage This link between leaders policy positions and their personal images steers US foreign policy in directions that are more hawkish than what voters actually want Combining polling data with survey experiments and original archival research on cases from the Vietnam War through the occupations of Iraq and Afghanistan Friedman demonstrates that public opinion plays a surprisingly extensive and often problematic role in shaping US international behavior With the commander in chief test a perennial point of debate in national elections Friedman s insights offer important lessons on how the politics of image making impacts foreign policy and how the public should choose its president

*Strategy Dynamics* Matus Halas,2025-02-05 With a wealth of valuable empirical materials *Strategy Dynamics* explores the concept of adaptation in strategic decision making through detailed engagement with professional military education at various war colleges and three in depth case studies of significant strategic reversals by the United States France and former Czechoslovakia It examines President Ronald Reagan s decision to withdraw U S Marines from Lebanon in 1984 Francois Mitterrand s reversal of his original plan for the French exit from the European Monetary System in 1983 and Vclav Havel s strategic pivot towards NATO membership for Czechoslovakia in 1991 After introducing a novel process oriented model of strategic decision making that highlights the positive effect of friction on strategy adaptation the author uses process tracing to analyse factors at the individual domestic and international levels that enabled and triggered these strategic U turns The research draws on declassified and previously unavailable documents as well as interviews with key figures involved in these strategic decisions providing unique insights into the complexities of strategic decision making and the process of strategy adaptation The book compels readers to see strategy as a dynamic process continuously evolving in response to changing circumstances rather than as a fixed plan In doing so *Strategy Dynamics* fills a critical gap in the literature by focusing on the processes that drive strategy adaptation It offers a comprehensive study of the conditions that contribute to open societies ability to adapt their strategies more effectively and it will serve as a reference for anyone dealing with strategy adaptation

**Into the Void** James D. Kiras,Martijn Kitzen,2024-06-06 The moment in the sun for special operations sometimes appears to have passed seemingly eclipsed by preparations for potential conflict under the guise of great power competition combined with failure in Afghanistan Yet the war in Ukraine serves as a reminder that special operations play an even greater role today before during and presumably after conflict The challenge remains dealing with current irregular and hybrid threats at the same time as preparing for an uncertain future as threats and technologies

evolve at a dizzying pace Focusing too much on the future of conventional warfare creates a void in national security discussions related to special operations This book seeks to fill that gap drawing on the expertise of scholars and practitioners in the field from the Indo Pacific Europe and the United States to answer what if anything special operations can or should seek to do and how The contributors explore such topics as proxies non state special forces capabilities innovation and transformation artificial intelligence and special operations in space and cyberspace These chapters are united by their analysis that special operations will have future strategic and operational value for allies and adversaries alike provided that difficult choices are made in the present

*Confronting Cyber Risk* Gregory J. Falco, Eric Rosenbach, 2022 Using real world examples from SolarWinds to the Colonial Pipeline attack *Confronting Cyber Risk* provides CEOs and cyber newcomers alike with a cutting edge strategy to mitigate an organization s operational reputational and litigational risk to malicious cyberattacks in an evolving cyber risk landscape

*War and the Art of Governance* Nadia Schadlow, 2017 Success in war ultimately depends upon the consolidation of political order Consolidating the new political order is not separate from war rather Nadia Schadlow argues that governance operations are an essential component of victory Despite learning this the hard way in past conflicts from the Mexican War through Iraq and Afghanistan US policymakers and the military have failed to institutionalize lessons about post conflict governance and political order for future conflicts *War and the Art of Governance* distills lessons from fifteen historical cases of US Army military intervention and governance operations from the Mexican War through the wars in Iraq and Afghanistan Improving outcomes in the future will require US policymakers and military leaders to accept that the political dimension is indispensable across the full spectrum of war Plans timelines and resources must be shaped to reflect this reality before intervening in a conflict not after things start to go wrong The American historical experience suggests that the country s military will be sent abroad again to topple a regime and install a new government Schadlow provides clear lessons that must be heeded before next time

*Military Strategy, Joint Operations, and Airpower* Ryan Burke, Michael Fowler, Kevin McCaskey, 2018-09-03 An ideal textbook for classes on modern airpower and joint operations

**The Sword's Other Edge** Dan Reiter, 2017-11-09 Military effectiveness can only be fully understood by accounting for its political and military tradeoffs This book explains those tradeoffs

*Withdrawal* Gregory A. Daddis, 2017 In a riveting sequel to his celebrated *Westmoreland s War* Daddis offers a bold new interpretation of America s first lost war Upending myths of a better war that led to victory in Vietnam *Withdrawal* is required reading for anyone hoping to understand the final years of American intervention in Southeast Asia

*How the United States Would Fight China* Franz-Stefan Gady, 2025-11 This is a detailed analysis of how the United States intends to fight a war against the People s Republic of China and why it risks strategic defeat based on its doctrine force structure and general way of war Franz Stefan Gady contends that the US military s current approach to a potential war over Taiwan is flawed relying heavily both on achieving rapid information superiority and on a decisive victory This is unlikely to succeed

and may increase the risk of nuclear escalation between the world's only genuine superpowers. A US-China war would more likely be characterized by prolonged attrition across multiple domains: cyber space, air, sea, and land, a conflict for which America's military and society are ill-prepared. The US also lacks a viable blueprint for the military forces or the industrial capacity for a long war of attrition. This deficiency stems from a military culture prioritizing advanced technology over mass and the lack of political will or public readiness for the sacrifices such a conflict would require. Gady's research and analysis both of the highest order reveal the significant risk of strategic defeat for the United States in a potential conflict with China whether in the 2020s or 2030s.

**Quantifying Counterfactual Military History** Brennen Fagan, Ian Horwood, Niall MacKay, Christopher Price, A. Jamie Wood, 2023-09-27. Forces shaping human history are complex but the course of history is undeniably changed on many occasions by conscious acts. These may be premeditated or responsive, calmly calculated or performed under great pressure. They may also be successful or catastrophic but how are historians to make such judgements and appeal to evidence in support of their conclusions? Further and crucially how exactly are we to distinguish probable unrealized alternatives from improbable ones? This book describes some of the modern statistical techniques that can begin to answer this question as well as some of the difficulties in doing so. Using simple well-quantified cases drawn from military history we claim that statistics can now help us to navigate the near-truths, the envelope around the events with which any meaningful historical analysis must deal and to quantify the basis of such analysis. *Quantifying Counterfactual Military History* is intended for a general audience who are interested in learning more about statistical methods both in military history and for wider applications. **Key Features:** This book demonstrates how modern statistical techniques can measure the impact of counterfactual decisions. It examines the importance of counterfactual reasoning for both modern scholars and historical actors. It combines historical narrative, mathematical precision, and data to create a straightforward presentation of both factual and counterfactual military history. It provides an original contribution to the debate over the validity and rigour of works of counterfactual history. It is written in a manner accessible to readers who have no formal training in History or Statistics.

**War on the Ballot** Andrew Payne, 2023-07-18. Winner 2024 Richard E. Neustadt Book Prize, American Politics Group, Political Studies Association. The president of the United States is at once holder of the highest elected office and commander in chief of the armed forces. How do upcoming elections influence presidents' behavior during wartime? How do presidents balance perceptions of the national interest with personal political interests? *War on the Ballot* examines how electoral politics shaped presidential decisions on military and diplomatic strategy during the wars in Korea, Vietnam, and Iraq. Drawing on a wealth of declassified documents and interviews with senior officials and military officers, Andrew Payne reveals the surprisingly large role played by political considerations during conflicts. He demonstrates how the exigencies of the electoral cycle drove leaders to miss opportunities to limit the human and financial costs of each war, gain strategic advantage, or sue for peace, sometimes making critical decisions with striking disregard for the consequences on the

ground Payne emphasizes the importance of electoral pressures throughout the full course of a conflict not just around the initial decision to intervene He shows how electoral constraints operate across different phases of the political calendar going beyond the period immediately preceding a presidential election Offering a systematic analysis of the relationship between electoral politics and wartime decision making this book raises crucial questions about democratic accountability in foreign policy

*History Continues* Sabri Kicmari,2022-12-07 Decades after Francis Fukuyama's end of history thesis became famous the conflicts and turmoil of history have returned Dr Kicmari having seen his own native land erupt in a European civil war in the 1990s has been thinking about these issues for many years This book highlights the return of ideology to international relations presenting harsh ideological models which challenge liberal democracy This becomes even more relevant in light of the Russian invasion of Ukraine The publication of this book aims to draw attention to the danger posed to world peace by ideological models alongside the need for commitment to strengthen democracy in the world and should interest diplomats journalists and scholars

**Building Special Operations Relationships with Fragile Partners:** Torsten Gojowsky,Sebastian Koegler,2019-02-18 Relationships empower Special Operations Forces SOF to perform as a highly skilled and reliable cadre in collaboration with local partner forces to prevent and solve shared problem sets often accomplishing more with less Since 9 11 however relationships between SOF and their partners have not always been properly built and maintained The authors trace the causal effects of constraints trainings and incentives and their impact on the current North Atlantic Treaty Organization NATO SOF approach of building enduring relationships Motivated by numerous deployments to Afghanistan Iraq and Syria with recurring problem sets we chose to conduct a structured focused comparison between U S and Danish SOF supporting Operation Inherent Resolve in Al Anbar Iraq 2015 2018 and German SOF during the shift of the NATO led International Security Assistance Force to Resolute Support mission in Afghanistan 2013 2015 The analysis of these cases finds that specific interactions of the studied factors not only cause variations in relationships between SOF and partner forces but ultimately influence operations and objectives determining mission success or failure With further testing of our analysis and recommendations this research can help to identify inherently flexible and nested strategic options for SOF senior leaders allowing them to deploy SOF elements efficiently during times of asymmetric diffuse and episodic conflicts Gojowsky and Koegler have written a fascinating and important manuscript concerning the use and lessons learned of SOF in recent asymmetrical conflicts In doing so the authors systematically assess modern SOF tactics techniques and procedures TTP and relationships between NATO SOF and their local partners This is a must read for those interested in the future of SOF as well as counter insurgencies future TTPs constraints and incentives Gojowsky and Koegler recommendations should be carefully considered by NATO and its member countries Professor Thomas H Johnson Author of Taliban Narratives The Use and Power of Stories in the Afghanistan Conflict Naval Postgraduate School Monterey California
