White, Lindy Willmott, 2021-12-09 Addresses the vexed question of how and why reform of end of life law occurs drawing on ten international case studies **Assisted Death** L. W. Sumner, 2011-07-07 Ethical and legal issues concerning physician assisted suicide and euthanasia are very much on the public agenda in many jurisdictions In this timely book L W Sumner addresses these issues within the wider context of palliative care for patients in the dying process His ethical conclusion is that a bright line between assisted death and other widely accepted end of life practices including the withdrawal of life sustaining treatment pain control through high dose opioids and terminal sedation cannot be justified In the course of the ethical argument many familiar themes are given careful and thorough treatment conceptions of death the badness of death the wrongness of killing informed consent and refusal the ethics of suicide cause of death the double effect the sanctity of life the active passive distinction advance directives and nonvoluntary euthanasia The legal discussion opens with a survey of some prominent prohibitionist and regulatory regimes and then outlines a model regulatory policy for assisted death Sumner concludes by defending this policy against a wide range of common objections including those which appeal to slippery slopes or the possibility of abuse and by asking how the transition to a regulatory regime might be managed in three common law prohibitionist jurisdictions

**Assisted Suicide and the European Convention on Human Rights** Stevie Martin, 2021-04-12 Locating assisted suicide within the broader medical end of life context and drawing on the empirical data available from the increasing number of permissive jurisdictions this book provides a novel examination of the human rights implications of the prohibition on assisted suicide in England and Wales and beyond Assisted suicide is a contentious topic and one which has been the subject of judicial and academic debate internationally The central objective of the book is to approach the question of the ban s compatibility with the European Convention on Human Rights afresh freed from the constraints of the existing case law and its erroneous approach to the legal issues and selective reliance on empirical data The book also examines the compatibility of the ban on assisted suicide with rights which have either been erroneously disregarded or not considered by either the domestic courts or the European Court of Human Rights Having regard to human rights jurisprudence more broadly including in the context of abortion the research and analysis undertaken here demonstrates that the ban on assisted

suicide violates the rights of a significant number of individuals to life to freedom from torture or inhuman or degrading treatment and to private life Such analysis does not depend on a strained or contrived approach to the rights at issue Rather the conclusions flow naturally from a coherent logical application of the established principles governing those rights While the focus of the book is the Suicide Act 1961 the conclusions reached have implications beyond England and Wales including for the other devolved jurisdictions and international jurisdictions Beyond courts and legislators it will be a valuable resource for students of human rights and medical law as well as medical and legal practitioners and academics working in human rights and end of life care
