Against The Current Readings For Writers:

Transitions in Writing ,2018-03-12 Transitions in Writing addresses the experiences of writers as they move between contexts of writing and juggle new and different demands Spelman Miller and Stevenson bring together research by scholars in a range of settings across the world who approach transition from different standpoints Transition is often conceived of as a change in setting coinciding with physical or temporal relocation such as between stages of an educational or professional career However writers also manage more local micro level transitions as they move between genres registers and rhetorical moves to meet the demands of the task The combination of both macro and micro level perspectives on transition offers a novel broad conception of the types of change a writer encounters and illustrates a range of methodological approaches appropriate to exploring such transitions

Resources in Education ,1993 **Philosophy in the Condition of Modernism** Ana Falcato, Antonio Cardiello,2018-05-03 Produced on the fringes of philosophy and literary criticism this book is a pioneering study which aims to explicitly address and thematize what may be called a critical philosophy in the condition of modernism Its most important and original contribution to both disciplines is a self conscious reflection on possible modes of writing philosophy today and a systematic comparison with what happened in literary modernism at the beginning of the twentieth century The volume is divided into six sections where internationally renowned scholars discuss such pressing topics as the role of an unreliable narrator in a major philosophical treatise the different mediums of art production and how these impact on our perception of the Work itself the role of narrative in animal ethics and the filmic adaption of a Modernist classic Challenges to Conventional Opinions on Qumran and Enoch Issues Paul Heger,2011-12-09 The study disputes allegations of dualism and determinism in the Dead Sea Scrolls and the substitution of Enoch s prophecies for the Mosaic Torah which are incompatible with the biblical doctrines that dominated Jewish society in the late Second Temple period The Electrical World ,1887

Electrical World ,1887 Touching the Unreachable Fusako Innami,2025-09-30 Fusako Innami offers the first

comprehensive study of touch and skinship relationality with the other through the skin in modern Japanese writing The concept of the unreachable that is the lack of characters complete ability to touch what they try to reach for provides a critical intervention on the issue of intimacy Touch has been philosophically addressed in France but literature is an effective or possibly the most productive venue for exploring touch in Japan as literary texts depict what the characters may be concerned with but may not necessarily say out loud Such a moment of capturing the gap between the felt and the said the interaction between the body and language can be effectively analyzed by paying attention to layers of verbalization or indeed translation by characters utterances authors depictions and readers interpretations Each of the writers discussed in this book starting with Nobel prize winner Kawabata Yasunari Tanizaki Jun ichir Yoshiyuki Junnosuke and Matsuura Rieko presents a particular obsession with objects or relationality to the other constructed via the desire for touch In *Touching the Unreachable* phenomenological and psychoanalytical approaches are cross culturally interrogated in engaging with literary touch to constantly challenge what may seem like the limit of transferability regarding concepts words and practices The book thereby not only bridges cultural gaps beyond geographic and linguistic constraints but also aims to decentralize a Eurocentric hegemony in its production and use of theories and brings Japanese cultural and literary analyses into further productive and stimulating intellectual dialogues Through close readings of the authors treatment of touch Innami develops a theoretical framework with which to examine intersensorial bodies interacting with objects and the environment through touch

Gramsci and Trotsky in the Shadow of Stalinism Emanuele Saccarelli, 2008-02-28 This book examines the legacy of Antonio Gramsci and Leon Trotsky in the shadow of Stalinism in order to reassess the very different and distorted academic reception of the two figures as well as to contribute to the revitalization of Marxism for our time While Gramsci and Trotsky lived and died in a similar fashion as revolutionary Marxist leaders and theoreticians their reception in academia could not be more different Gramsci has become tremendously popular becoming a central figure in many disciplines while Trotsky

remains largely ignored Saccarelli argues that not only is Gramsci popular for the wrong reasons being routinely distorted and depoliticized even when rescued from his contemporary users Gramsci remains inadequate Conversely the fact that Trotsky remains beyond the pale of theory is a terrible indictment of the current state of academic thinking **Proceedings of the ...
