Archibald, 2015-05-05 Want to know how to garden with lobsters How to sober up Grow a beard Or simply how to make a perfect omelet Look no further Rather look backward Based on the popular blog Ask the Past is full of the wisdom of the ages as well as the fad diets zany pickup lines and bacon Band Aids of the ages Drawn from centuries of antique texts by historian and bibliophile Elizabeth P Archibald Ask the Past offers a delightful array of advice both wise and weird Whether it's eighteenth century bedbug advice sprinkle bed with gunpowder and let smolder budget fashion tips of the Middle Ages save on the clothes splurge on the purse or a sixteenth century primer on seduction hint do no pass gas Ask the Past is a wildly entertaining guide to life from the people who lived it first **The Art of Compilation** Anna Dorofeeva, 2025-03-04 The Art

of Compilation Manuscripts and Networks in the Early Medieval Latin West interrogates the medieval manuscript book as a dynamic constantly changing object entangled in intellectual and cultural networks constructed and deconstructed by different people and transmuting in form and meaning over time Medieval manuscripts are not static permanently bound and delimited but rather serve as evidence for the layered relationships between texts and their material supports and when we realize that we gain a clearer view of medieval manuscript culture as driven by the agency and intellectual exchange of the people behind it This volume of essays investigates early medieval Western European manuscript culture as a field of entangled objects focusing on the connections between knowledge selection material representation and scribal agency The complex road of compiling selected texts into manuscripts compilatio in the early Middle Ages is still not well understood yet it is the key to the historical context surrounding medieval manuscript culture The practice of knowledge selection consisted of three key stages the intellectual selection of the textual content of manuscript collections the pragmatic action of arranging the textual content in a draft form by authors or editors and the material representation and aesthetic exposition of texts in manuscripts These stages were part of a linear development but also exercised reciprocal influence upon one another By tracing this process in surviving manuscript collections we can better understand in what practical ways

knowledge was encoded and how these often innovative and experimental practices contributed to the emergence and consolidation of intellectual and scribal traditions This has important implications for how we understand education reform and the exercise of power in the early Middle Ages
