Assessing for Learning Peggy L. Maki, 2023-07-03 While there is consensus that institutions need to represent their educational effectiveness through documentation of student learning the higher education community is divided between those who support national standardized tests to compare institutions educational effectiveness and those who believe that valid assessment of student achievement is based on assessing the work that students produce along and at the end of their educational journeys This book espouses the latter philosophy what Peggy Maki sees as an integrated and authentic approach to providing evidence of student learning based on the work that students produce along the chronology of their learning She believes that assessment needs to be humanized as opposed to standardized to take into account the demographics of institutions as students do not all start at the same place in their learning Students also need the tools to assess their own progress In addition to updating and expanding the contents of her first edition to reflect changes in assessment practices and developments over the last seven years such as the development of technology enabled assessment methods and the national need for institutions to demonstrate that they are using results to improve student learning Maki focuses on ways to deepen program and institution level assessment within the context of collective inquiry about student learning Recognizing that assessment is not initially a linear start up process or even necessarily sequential and recognizing that institutions develop processes appropriate for their mission and culture this book does not take a prescriptive or formulaic approach to building this commitment What it does present is a framework with examples of processes and strategies to assist faculty staff administrators and campus leaders to develop a sustainable and shared core institutional process that deepens inquiry into what and how students learn to identify and improve patterns of weakness that inhibit learning This book is designed to assist colleges and universities build a sustainable commitment to assessing student learning at both the institution and program levels It provides the tools for collective inquiry among faculty staff administrators and students to develop evidence of students abilities to integrate apply and transfer learning as well as to construct their own meaning Each chapter also concludes with 1 an Additional Resources section that includes references to meta sites with further resources so users can pursue particular issues in greater depth and detail and 2 worksheets guides and exercises designed to build collaborative ownership of assessment The second edition now covers Strategies to connect students to an institution s or a program s assessment commitment Description of the components of a comprehensive institutional commitment that engages the institution educators and students all as learners Expanded coverage of direct and indirect assessment methods including technology enabled methods that engage students in the process New case studies and campus examples covering undergraduate graduate education and the co curriculum New chapter with case studies that presents a framework for a backward designed problem based assessment process anchored in answering open ended

Student Learning in Higher Education John Wilson, 2018-10-11 Originally published in 1981 Student Learning in Higher Education fills an important gap by bringing together in a concise and readable form research from Britain the USA and elsewhere and by discussing the curricular implications for staff who wish to assist their students to see meaning in their studies It focuses on issues of general relevance explores major research questions and outlines different methodologies and approaches It discusses what is meant by meaningful learning and describes typical learning tasks encountered by arts and science students It looks at how students decide what to study on a course and how assessment demands shape both their perceptions of what should be learned and their study behaviour As well as considering the ways in which students change and develop over their years in college the book also discusses the relative importance of teaching and informal influences

such as the student peer group This book attempts to provide a state of the art review of the literature in a field of central concern for all who prepare students for or work within higher education

Improving Student Engagement and Development through Assessment Lynn Clouder, Christine Broughan, Steve Jewell, Graham Steventon, 2013-05-20 With a unique focus on the relationship between assessment and engagement this book explores what works in terms of keeping students on course to succeed Against a backdrop of massification and the associated increase in student diversity there is an escalating requirement for personalized technology driven learning in higher education In addition the advent of student fees has promoted a consumer culture resulting in students having an increasingly powerful voice in shaping curricula to their own requirements How does one engage and retain a group of students of such diverse culture ethnicity ambition and experience Using examples from a variety of institutions worldwide this edited collection provides a well researched evidence base of current thinking and developments in assessment practices in higher education The chapters discuss Staff and student views on assessment Engaging students through assessment feedback Assessment for learning Assessing for employability Interdisciplinary and transnational assessment Technology supported assessment for retention The book draws together a wealth of expertise from a range of contributors including academic staff academic developers pedagogical researchers National Teaching Fellows and Centres for Excellence in Higher Education Recognising that a pedagogy which is embedded and taken for granted in one context might be completely novel in another the authors share best practice and evaluate evidence of assessment strategies to enable academic colleagues to make informed decisions about adopting new and creative approaches to assessment This interdisciplinary text will prove an invaluable tool for those working and studying in higher education

Approaches to Assessment that Enhance Learning in Higher Education Stylianos Hatzipanagos, Rebecca Rochon, 2014-10-10 This book addresses the need to diversify mainstream forms of assessment currently used in Higher Education in order to re establish the focus on the learning process Making assessment central to student learning is about returning to what current research emphasises the primary beneficiary of assessment should be the

student To achieve this in the assessment context students and tutors must engage in a process of dialogue and feedback It seems to be widely accepted that assessment succeeds when the learner monitors identifies and then is able to bridge the gap between current learning achievements and agreed goals It is however more questionable whether adequate opportunities are given to students to be active participants in closing what has been termed the loop Contributors to this book have responded in different ways to the challenge of enhancing learning through assessment offering reasons for the lack of focus on learning within assessment processes as well as suggesting possible solutions The chapters demonstrate a balance between innovation and practicality drawing on the underpinning theories The result is both rich in discussion and an extremely useful resource for practitioners This book was originally published as a special issue of Assessment Evaluation in Higher Education
