Mr Craig Paterson

Assisted Suicide And Euthanasia Assisted Suicide And Euthanasia:

New Directions in the Ethics of Assisted Suicide and Euthanasia Michael Cholbi, Jukka Varelius, 2015-08-20 This book provides novel perspectives on the ethical justifiability of assisted dying Seeking to go beyond traditional debates on topics such as the value of human life and questions surrounding intention and causation this volume promises to shift the terrain of the ethical debates about assisted dying It reconsiders the role of patient autonomy and paternalistic reasons as well as the part proposed for medical professionals and clinical ethics consultation in connection with assisted dying relates the debate on assisted dying to questions about organ donation and developments in medical technology and demonstrates the significance of experimental philosophy in assessing questions of assisted dying This book is ideal for advanced courses in bioethics and health care ethics

Assisted Suicide and Euthanasia Mr Craig Paterson, 2012-10-01 As medical technology advances and severely injured or ill people can be kept alive and functioning long beyond what was previously medically possible the debate surrounding the ethics of end of life care and quality of life issues has grown more urgent In this lucid and vigorous book Craig Paterson discusses assisted suicide and euthanasia from a fully fledged but non dogmatic secular natural law perspective He rehabilitates and revitalises the natural law approach to moral reasoning by developing a pluralistic account of just why we are required by practical rationality to respect and not violate key demands generated by the primary goods of persons especially human life Important issues that shape the moral quality of an action are explained and analysed intention foresight action omission action consequences killing letting die innocence non innocence person non person Paterson defends the central normative proposition that it is always a serious moral wrong to intentionally kill an innocent human person whether self or another notwithstanding any further appeal to consequences or motive

Euthanasia James D. Torr, 1999 Presents opposing views on the ethical issues related to euthanasia physician participation and legalization of voluntary euthanasia

Euthanasia and Physician-Assisted Suicide Gerald Dworkin, R. G. Frey, Sissela Bok, 1998-08-28 A Cry for Help

The Future of Assisted Suicide and Euthanasia Neil M. Gorsuch, 2009-03-23 From U S Supreme Court Justice and bestselling author Neil Gorsuch an argument against the legalization of assisted suicide and euthanasia The Future of Assisted Suicide and Euthanasia provides the most thorough overview of the ethical and legal issues raised by assisted suicide and euthanasia as well as the most comprehensive argument against their legalization ever published In clear terms accessible to the general reader Neil Gorsuch thoroughly assesses the strengths and weaknesses of leading contemporary ethical arguments for assisted suicide and euthanasia He explores evidence and case histories from the Netherlands and Oregon where the practices have been legalized He analyzes libertarian and autonomy based arguments for legalization as well as the impact of key U S Supreme Court decisions on the debate And he examines the history and evolution of laws and attitudes regarding assisted suicide and euthanasia in American society After assessing the strengths and weaknesses of arguments for assisted suicide and euthanasia Gorsuch

builds a nuanced novel and powerful moral and legal argument against legalization one based on a principle that surprisingly has largely been overlooked in the debate the idea that human life is intrinsically valuable and that intentional killing is always wrong At the same time the argument Gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life sustaining care permitting intervention only in cases where an intention to kill is present Those on both sides of the assisted suicide question will find Gorsuch's analysis to be a thoughtful and stimulating contribution to the debate about one of the most controversial public policy issues of our day

Last Rights? Michael M. Uhlmann, 1998 This rich and comprehensive anthology of primary sources is the essential reference work for anyone interested in understanding the arguments moral theological medical and legal on both sides of the assisted suicide and euthanasia debate

Assisted Death in Europe and America Guenter Lewy, 2011 Advances in medical treatment now enable physicians to prolong life to a previously unknown extent however in many instances these new techniques mean not the saving of life but prolonging the act of dying In the eyes of many medical technology has run out of control and contributes to unnecessary suffering Hence the demand has arisen that patients should be entitled to choose death when pain and physical and mental deterioration have destroyed the possibility of a dignified and meaningful life and that their doctors should help them to realize this endeavor At the present time there are seven jurisdictions in the world that with various restrictions have legalized the practice of assisted death physician assisted suicide and or voluntary euthanasia to wit the Netherlands Belgium Luxembourg Switzerland in Europe and the states of Oregon Washington and Montana in the United States Four of these regimes in the Netherlands Belgium Switzerland and the state of Oregon have been functioning for many years and we have for them a substantial body of data as well as much observational research This book is based upon this material The literature dealing with the moral legal and social aspects of assisted death is voluminous but there is a paucity of writing that provides a detailed account of the way these four regimes are actually working Many partisans on both sides of the issue cite existing data selectively or at times willfully distort the empirical evidence in order to strengthen their case Based on the documentary record and interviews with officials and scholars this book seeks to give the specialist as well as the general interested reader a reliable picture of the way assisted death functions and to draw relevant lessons While accurate factual information cannot settle a moral debate it nevertheless is a precondition of any well founded argument The author speaks authoritatively about the issues he addresses I think this book does make an important contribution to the field It will be of interest to students and scholars of PAS as a source of information and reference I definitely recommend publication Stuart Youngner Department of Bioethics Case Western Reserve University School of Medicine The information collected here makes an important contribution to the literature on PAS because it collects a broad array of relevant information into a single volume It is interesting and enlightening This will make the book a valuable resource for anyone interested in the subject and an especially useful resource for academics who study or teach about the

Cholbi, 2017-01-26 This book addresses key historical scientific

legal and philosophical issues surrounding euthanasia and assisted suicide in the United States as well as in other countries and cultures Euthanasia was practiced by Greek physicians as early as 500 BC In the 20th century legal and ethical controversies surrounding assisted dying exploded Many religions and medical organizations led the way in opposition citing the incompatibility of assisted dying with various religious traditions and with the obligations of medical personnel toward their patients Today these practices remain highly controversial both in the United States and around the world Comprising contributions from an international group of experts this book thoroughly investigates euthanasia and assisted suicide from an interdisciplinary and global perspective It presents the ethical arguments for and against assisted dying highlights how assisted dying is perceived in various cultural and philosophical traditions for example South and East Asian cultures Latin American perspectives and religions including Islam and Christianity and considers how assisted dying has both shaped and been shaped by the emergence of professionalized bioethics Readers will also learn about the most controversial issues related to assisted dying such as pediatric euthanasia assisted dying for organ transplantation and suicide tourism and examine concerns relating to assisted dying for racial minorities children and the disabled

Euthanasia and Physician-Assisted Suicide By: Michael Manning, M.D., A concise overview of the history and arguments surrounding euthanasia and physician assisted suicide

Is there a Christian Case for Assisted Dying Paul Badham, 2009-01-23 Issues surrounding euthanasia and assisted dying continue to hit the headlines with strong feelings on both sides In *Is There a Christian Case for Assisted Dying* Paul Badham makes a significant and controversial contribution to this important and current debate

The Good Euthanasia Guide Derek Humphry, 2005 The Good Euthanasia Guide is a where to and why book which complements the how to of *Final Exit* It contains an annotated list of every right to die group in the world and a unique account of the assisted suicide laws in almost every country a filmography and a bibliography Dr Jack Kevorkian's life and work are reported in three chapters

The Price of Compassion Michael Stiglitz, 2010-05-12 This important book includes a compelling selection of original essays on euthanasia and associated legislative and health care issues together with important background material for understanding and assessing the arguments of these essays The book explores a central strand in the debate over medically assisted death the so called slippery slope argument The focus of the book is on one particularly important aspect of the downward slope of this argument hastening the death of those individuals who appear to be suffering greatly from their medical condition but are unable to request that we do anything about that suffering because of their diminished mental capacities Slippery slope concerns have been raised in many countries including Britain the Netherlands Canada and the United States This book concentrates most of its attention on the latter two countries Stiglitz divides the book into four parts Part I lays out the relevant public policies in the form of legal judgments making them the philosophical point of departure for readers Part II discusses the ever present slippery slope objection to assisted suicide and other forms of euthanasia Parts III and IV examine the role of social factors and political structures in

determining the morality and legalization of voluntary and non voluntary euthanasia These sections are especially valuable The inclusion of a selection of papers on the relationship between the morality and legality of euthanasia and systems of health care delivery is of particular interest especially to those who want to make statistical legal and moral comparisons between the USA and Canada Physician Assisted Suicide Margaret P. Battin, Rosamond Rhodes, Anita Silvers, 2015-10-15 Physician Assisted Suicide is a cross disciplinary collection of essays from philosophers physicians theologians social scientists lawyers and economists As the first book to consider the implications of the Supreme Court decisions in Washington v Glucksburg and Vacco v Quill concerning physician assisted suicide from a variety of perspectives this collection advances informed reflective vigorous public debate **Assisted Dying for the Terminally Ill Bill (HL)** Great Britain: Parliament: House of Lords: Select Committee on the Assisted Dying for the Terminally Ill Bill, 2005-04-28 The Bill was published as HLB 4 session 2004 05 ISBN 01084188390 This volume contains a selection of the 14 000 personal letters and other submissions received by the Committee with regards to their inquiry into the Bill Giving Death a Helping Hand Dieter Birnbacher, Edgar Dahl, 2008-01-22 Public policy surrounding the hotly debated issue of physician assisted suicide is examined in detail You ll find an analysis of the current legal standing and practice of physician assisted suicide in several countries Authors discuss the ethical principles underlying its legal and professional regulation Personal narratives provide important first hand accounts from professionals who have been involved in end of life issues for many years **Death Talk** Margaret A. Somerville, 2001 Argues that people who promote the legalization of euthanasia ignore the vast ethical legal and social differences between euthanasia and natural death Permitting euthanasia Somerville demonstrates would cause irreparable harm to respect for human life and society Cover **Assisted Dying** Sheila McLean, 2007-11-27 Assisted Dying explores the law relating to euthanasia and assisted suicide tracing its development from prohibition through to the laissez faire attitude adopted in a number of countries in the 21st Century This book provides an in depth critique of the arguments surrounding legislative control of such practices and particularly looks into the regulatory role of the state In the classical tradition of libertarianism the state is generally presumed to have a remit to intervene where an individual s actions threaten another rather than harm the individuals themselves This arguably leaves a question mark over the state s determined intervention in the UK and elsewhere into the private and highly personal choices of individuals to die rather than live The perceived role of the state in safeguarding the moral values of the community and the need for third party involvement in assisted suicide and euthanasia could be thought to raise these practices to a different level These considerations may be in direct conflict with the so called right to die espoused by some individuals and groups within the community However this book will argue that the state s interests are and should be second to the interests that the people themselves have in choosing their own death Assisted Dying is winner of the The Minty Prize of the Society of Authors and winner of the Royal Society of Medicine Book Awards 2008
