Detailing and Modifying Ready-to-Run Locomotives in 00 Gauge George Dent, 2014-06-30 During the twenty years in which Britain's nationalized railway operated mainline steam locomotives a vast array of individual designs complemented the British Railways Standard machines built up to 1960. Such was the variety of motive power to be seen on the network that this early period of BR's existence has proved to be the most enduring amongst enthusiasts and modellers. The ready to run market has reflected this popularity in terms of models and liveries available off the shelf. Despite constantly rising levels of detail finish and performance r t r models can never cater for every variation in components equipment or livery that invariably arose within large and long lived fleets. Nor can they offer particular running numbers and names to satisfy every customer while older products may also require work to bring them up to the standard of contemporary offerings. Therefore being able to change factory applied decals add period or individual locomotive specific details modify a livery or create an authentic weathered finish can prove vital to achieving a heightened sense of realism and individuality within our traction fleets. Aimed at modellers of all abilities and serious model railway enthusiasts this book gives details of a wide range of techniques materials and tools and is lavishly illustrated with 400 colour photographs.
