## Operation, Assembly & Maintenance Manual

Congratulations on your purchase, and thank you for selecting the BoilerMaker™ stainless steel brew pot from Blichmann Engineering. We are confident that it will provide you years of service and many gallons of outstanding beer. This manual will familiarize you with the assembly, installation procedures, and use of the BoilerMaker™ Brew pot and accessories.

\*\*\*\* PLEASE READ THOROUGHLY PRIOR TO USE FOR IMPORTANT SAFETY INFORMATION \*\*\*\*

### IMPORTANT !!

**Warning:** Sections labeled "Warning" can lead to serious injury or death if not followed. Please read these thoroughly and understand them completely before use. If you do not understand them or have any questions, contact your retailer or Blichmann Engineering ([www.BlichmannEngineering.com](http://www.BlichmannEngineering.com)) before use.

**Caution:** Sections labeled "Caution" can lead to equipment damage or unsatisfactory performance of the equipment. Please read these sections thoroughly. If you have any questions, contact your retailer or Blichmann Engineering ([www.BlichmannEngineering.com](http://www.BlichmannEngineering.com)) before use.

## Assembly & Installation:

The BoilerMaker™ brew pot comes fully assembled except for the DownMixer™ which is shipped not-installed to prevent shipping damage. However, we do recommend that you clean the product thoroughly prior to use to remove any traces of manufacturing oils etc including disassembling the valve.

**Caution:** As with all heated thermometers, excessive heat from high BTU propane burners can damage the scale in the case causing the inside to fog. This failure is not covered under warranty. A 10" X 6" flat stainless shield is provided to help you deflect heat from these components. Place the shield under the pot as shown in Fig. 1. Depending on the design of your burner or stand, it may be necessary for you to fabricate a support for the shield. This is not included with the product. In all cases, always keep the flame low enough that it does not roll over the corners of the pot. If you cannot hold your hand in the case of the thermometer during operation, it is too hot and you must reflect the heat from the burner. Lastly, avoid direct spray of water on the thermometer and do not immerse it in water for cooling or cleaning. Excessive thermal shock can shatter the glass head.

Assemble the DownMixer™ as shown in Fig. 2, tightening the nut snugly (20 ft-lb or 27 N-m) using wrenches, but do not use excessive force. Do not use grip tape on the threads.
