

The background of the book cover is a large, circular, reddish-brown illustration. It depicts two Maya figures in traditional attire, possibly engaged in a ritual or a dance. The figures are surrounded by various symbols, including a large skull in the center, and the entire scene is framed by a decorative border. The title 'BONES OF THE MAYA' is written in large, white, serif capital letters across the top of the illustration.

**The Oxford Handbook of the Archaeology of Diet** Julia Lee-Thorp, M. Anne Katzenberg, 2024-06-24 Humans are unique among animals for the wide diversity of foods and food preparation techniques that are intertwined with regional cultural distinctions around the world The Oxford Handbook of the Archaeology of Diet explores evidence for human diet from our earliest ancestors through the dispersal of our species across the globe As populations expanded people encountered new plants and animals and learned how to exploit them for food and other resources Today globalization aside the results manifest in a wide array of traditional

cuisines based on locally available indigenous and domesticated plants and animals How did this complexity emerge When did early hominins actively incorporate animal foods into their diets and later exploit marine and freshwater resources What were the effects of reliance on domesticated grains such as maize and rice on past populations and the health of individuals How did a domesticated plant like maize move from its place of origin to the northernmost regions where it can be grown Importantly how do we discover this information and what can be deduced about human health biology and cultural practices in the past and present Such questions are explored in thirty three chapters written by leading researchers in the study of human dietary adaptations The approaches encompass everything from information gleaned from comparisons with our nearest primate relatives tools used in procuring and preparing foods skeletal remains chemical or genetic indicators of diet and genetic variation and modern or historical ethnographic observations Examples are drawn from across the globe and information on the research methods used is embedded within each chapter The Handbook provides a comprehensive reference work for advanced undergraduate and graduate students and for professionals seeking authoritative essays on specific topics about diet in the human past

**Bioarchaeology of Pre-Columbian Mesoamerica** Cathy Willermet, Andrea Cucina, 2018-09-03 This volume offers a novel interdisciplinary view of the migration mobility ethnicity and social identities of pre Columbian Mesoamerican peoples In studies that combine bioarchaeology ethnohistory isotope data and dental morphology contributors demonstrate the challenges and rewards of such integrative work when applied to large regional questions of population history The essays in this volume are the results of fieldwork in Honduras Belize and a variety of sites in Mexico One chapter uses dental health data and burial rituals to investigate the social status of sacrificial victims during the Late Classic period Another analyzes skeletal remains from multiple research perspectives to explore the immigrant makeup of the multiethnic city of Copan Contributors also use strontium and oxygen isotope data from tooth enamel and dental morphological traits to test hypotheses about migration and they incorporate ethnohistorical sources in an examination of ancient Maya understandings of belonging and otherness Revealing how complementary fields of study can together create a better understanding of the complex forces that impact population movements this volume provides an inspiring picture of the exciting collaborative work currently under way among researchers in the region A volume in the series Bioarchaeological Interpretations of the Human Past Local Regional and Global Perspectives edited by Clark Spencer Larsen

Maya Christians and Their Churches in Sixteenth-Century Belize Elizabeth Graham, 2020-03-17 It is widely held that Christianity came to Belize as an extension of the conquest of Yucatan and that adherence to Christian belief and practice was abandoned in the absence of enduring Spanish authority An alternative view comes from the excavations of Maya churches at Tipu and Lamanai which show that the dead were buried in Christian churchyards long after the churches themselves fell into disuse and pre Columbian ritual objects were cached in Christian sacred spaces both during and after Spanish occupation Excavations also reveal that the architectural style of these early churches is Franciscan in inspiration

but nonetheless the product of continuing community efforts at construction and repair A conclusion difficult to ignore is that the Maya of Tipu and Lamanai considered themselves Christians with or without Spanish presence Viewing historical and archaeological data through the lens of her personal experience of Roman Catholicism and informed by feminist approaches Elizabeth Graham assesses the concept of religion the significance of doctrine the empowerment of the individual and the process of conversion by examining the meanings attributed to ideas objects and images by the Maya by Iberian Christians and by archaeologists Graham s provocative study also makes the case that the impact of Christianity in Belize was a phenomenon that uniquely shaped the development of the modern nation A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase     *The Bioarchaeology of Space and Place* Gabriel D. Wrobel, 2014-04-16 The Bioarchaeology of Space and Place investigates variations in social identity among the ancient Maya by focusing on individuals and small groups identified archaeologically by their inclusion in specific discrete mortuary contexts or by unusual mortuary treatments Utilizing archaeological biological and taphonomic data from these contexts the studies employ a variety of methodological approaches to reconstruct aspects of individuals life course and mortuary pathways Following this specific mortuary behaviors are discussed in relation to their local or regional cultural setting using relevant archaeological ethnohistoric and or ethnographic data in an effort to interpret their meaning within the broader social political and economic contexts in which they were carried out This volume covers a number of topics that are currently being debated in Maya archaeology including identification and discussion of the role and extent of human sacrifice in Maya culture the use of ancestors for maintaining political power the mortuary use of caves by both elites and non elites ethnic distinctions within urban areas and the extent of movement of people between communities Importantly the papers in this volume attempt to test and move beyond static dichotic categories that are often employed in mortuary studies in an effort to better understand the complex ways in which the Maya conceptualized and manipulated social identity This type of nuanced case study approach that incorporates historical archaeological and theoretical contextualization is becoming increasingly important in the field of bioarchaeology providing valuable sources of data where small diverse samples impede populational approaches     *Histories of Maize* John Staller, Robert Tykot, Bruce Benz, 2016-12-05 Maize has been described as a primary catalyst to complex sociocultural development in the Americas State of the art research on maize chronology molecular biology and stable carbon isotope research on ancient human diets have provided additional lines of evidence on the changing role of maize through time and space and its spread throughout the Americas The multidisciplinary evidence from the social and biological sciences presented in this volume have generated a much more complex picture of the economic political and religious significance of maize The volume also includes ethnographic research on the uses and roles of maize in indigenous cultures and a linguistic section that includes chapters on indigenous folk taxonomies and the role and meaning of maize to the development of civilization *Histories of Maize* is the most comprehensive reference source on the botanical

genetic archaeological and anthropological aspects of ancient maize published to date This book will appeal to a varied audience and have no titles competing with it because of its breadth and scope The volume offers a single source of high quality summary information unavailable elsewhere

**Multiethnicity and Migration at Teopancazco** Linda R. Manzanilla, 2017-03-28 Like modern day New York City the ancient city of Teotihuacan in Central Mexico was built by a flood of immigrants who created a complex and diverse urban landscape The city benefited from the knowledge technical expertise and experience that foreigners brought The neighborhoods also competed with each other in displaying the finest crafts the rarest raw materials and the most lavish sumptuary goods This detailed volume looks at 116 formal burials in Teopancazco a powerful neighborhood that controlled the distribution of foreign raw materials from Teotihuacan toward Nautla in Veracruz Applying sophisticated bioarchaeological analyses of stable and strontium isotopes trace elements funerary patterns and ancient DNA this holistic study identifies the population s age and sex profiles paleopathologies paleodiet provenance and facial approximations What emerges is a detailed portrait of a multiethnic group working and interacting in one of the largest urban sites in the preindustrial world Contributors Luis Adri n Alvarado Brenda A Alvarez Sandoval Mar a Isabel Casar Aldrete Edith Cienfuegos Lilia Escorcia Jos Ram n Gallego Teodoro Hern ndez Peter Horn Becket Lailson Linda R Manzanilla Gabriela In s Mej a Appel Rafael Montiel Pedro A Morales Puente Francisco Javier Otero Peter Schaaf Gabriela Natalia Sol s Pichardo

**Farming, Hunting, and Fishing in the Olmec World** Amber M. VanDerwarker, 2010-01-01 The Olmec who anciently inhabited Mexico s southern Gulf Coast

organized their once egalitarian society into chiefdoms during the Formative period 1400 BC to AD 300 This increase in political complexity coincided with the development of village agriculture which has led scholars to theorize that agricultural surpluses gave aspiring Olmec leaders control over vital resources and thus a power base on which to build authority and exact tribute In this book Amber VanDerwarker conducts the first multidisciplinary analysis of subsistence patterns at two Olmec settlements to offer a fuller understanding of how the development of political complexity was tied to both agricultural practices and environmental factors She uses plant and animal remains as well as isotopic data to trace the intensification of maize agriculture during the Late Formative period She also examines how volcanic eruptions in the region affected subsistence practices and settlement patterns Through these multiple sets of data VanDerwarker presents convincing evidence that Olmec and epi Olmec lifeways of farming hunting and fishing were driven by both political and environmental pressures and that the rise of institutionalized leadership must be understood within the ecological context in which it occurred

**Cuban Archaeology in the Caribbean** Ivan Roksandic, 2016-09-20 Changes the conversation about Cuban archaeology as a whole presenting groundbreaking data and interpretations that will be useful for prehistoric and historical archaeologists working the region Samuel M Wilson author of *The Archaeology of the Caribbean* Presents a collection of essays that will tremendously facilitate the linkage of issues in Cuban archaeology with the rest of the Caribbean and surrounding areas Peter E Siegel coeditor of *Protecting Heritage in the Caribbean* As the largest and most centrally located island of the Caribbean Cuba has seen successive waves of migration to its shores Its early colonization and that of the Greater Antilles is complicated by population movements within the Circum Caribbean In this volume Ivan Roksandic and an international team of researchers present a new theory of mainland migration into the Caribbean Through analysis of early agriculture burial customs dental modification pottery production and dietary patterns the contributors enable a very close look at the lifeways and challenges of the native populations They decipher patterns of movement between the islands and present day Mexico and Central America and explore the interactions between the islands inhabitants including the fate of indigenous groups after European contact Together the essays produce a view of the early Caribbean that is rich with dynamic networks of exchange and matrixes of cultural influences more intricate and multilinear than previously believed With contributions from archaeology physical anthropology environmental archaeology paleobotany linguistics and ethnohistory this volume adds to ongoing debates concerning migration and colonization It examines the importance of landscape and seascape in shaping human experience the role that contact and interaction between different groups play in building identity and the contribution of native groups to the biological and cultural identity of postcontact and modern societies Ivan Roksandic assistant professor in the Department of Anthropology and coordinator of the Interdisciplinary Linguistics Program at the University of Winnipeg is the author of *The Ouroboros Seizes Its Tale Strategies of Mythopoeia in Narrative Fiction* A volume in the Florida Museum of Natural History Ripley P Bullen Series

**Communities in Contact**

Corinne Lisette Hofman, Anne van Duijvenbode, 2011 *Communities in Contact* represents the outcome of the Fourth International Leiden in the Caribbean symposium entitled *From Prehistory to Ethnography in the circum Caribbean*. The contributions included in this volume cover a wide range of topics from a variety of disciplines: archaeology, bioarchaeology, ethnohistory and ethnography revolving around the themes of mobility and exchange, culture contact and settlement and community. The application of innovative approaches and the multi-dimensional character of these essays have provided exiting new perspectives on the indigenous communities of the circum Caribbean and Amazonian regions throughout prehistory until the present.

**A World View of Bioculturally Modified Teeth** Scott E. Burnett, Joel D. Irish, 2017-10-31  
Body modifications be they tattoos, piercings or implants have been with humankind for most of its existence. This volume shows that one aspect of that modification, dental modification, has been around for eons. This volume, based on a well-attended symposium at the American Association of Physical Anthropology meeting, goes beyond the simple textual descriptions to explore the cultural context and biological implications of these modifications. How can these be used to identify status, class, migration and even health?

The Routledge Handbook of Archaeological Human Remains and Legislation Nicholas Marquez-Grant, Linda Fibiger, 2011-03-21  
Methodologies and legislative frameworks regarding the archaeological excavation, retrieval, analysis, curation and potential reburial of human skeletal remains differ throughout the world. As work forces have become increasingly mobile and international research collaborations are steadily increasing, the need for a more comprehensive understanding of different national research traditions, methodologies and legislative structures within the academic and commercial sector of physical anthropology has arisen. *The Routledge Handbook of Archaeological Human Remains and Legislation* provides comprehensive information on the excavation of archaeological human remains and the law through 62 individual country contributions from Europe, Asia, Africa, North America, South America and Australasia. More specifically, the volume discusses the following: What is the current situation, including a brief history of physical anthropology in the country? What happens on discovering human remains: who is notified, etc? What is the current legislation regarding the excavation of archaeological human skeletal remains? Is a license needed to excavate human remains? Is there any specific legislation regarding excavation in churchyards? Any specific legislation regarding war graves? Are physical anthropologists involved in the excavation process? Where is the cut-off point between forensic and archaeological human remains, e.g. 100 years, 50 years, 25 years? Can human remains be transported abroad for research purposes? What methods of anthropological analysis are mostly used in the country? Are there any methods created in that country which are population specific? Are there particular ethical issues that need to be considered when excavating human remains, such as religious groups or tribal groups? In addition, an overview of landmark anthropological studies and important collections are provided where appropriate. The entries are contained by an introductory chapter by the editors which establish the objectives and structure of the book, setting it within a wider archaeological framework and a conclusion which

explores the current European and world wide trends and perspectives in the study of archaeological human remains The Routledge Handbook of Archaeological Human Remains and Legislation makes a timely much needed contribution to the field of physical anthropology and is unique as it combines information on the excavation of human remains and the legislation that guides it alongside information on the current state of physical anthropology across several continents It is an indispensable tool for archaeologists involved in the excavation of human remains around the world
