

A photograph of a woman with long brown hair, smiling and holding the hands of a bonobo. The bonobo is looking directly at the camera. The background is a soft-focus green, suggesting a natural habitat.

"Funny, adventurous, and heartbreaking.
This must-read book illuminates extraordinary
courage in both people and animals."

Bonobo Handshake A Memoir Of Love And Adventure In The Congo

Sharon Patricia Holland

Bonobo Handshake A Memoir Of Love And Adventure In The Congo:

Bonobo Handshake Vanessa Woods, 2010 Traces how a Discovery Channel writer and her scientist fiancé settled in a Bonobo sanctuary in war-torn Congo where their research enabled greater understandings of the characteristics and largely peaceful culture of the rare ape that shares 98.7 percent of human DNA By the author of *It's Every Monkey for Themselves*

Desire Change Heather Davis, 2017-06-26 In the resistance to the violence of gender-based oppression vibrant but often ignored worlds have emerged full of nuance, humour and beauty Correcting an absence of writing about contemporary feminist work by Canadian artists *Desire Change* considers the resurgence of feminist art thought and practice in the past decade by examining artworks that respond to themes of diversity and desire Essays by historians, artists and curators present an overview of a range of artistic practices including performance, installation, video, textiles and photography Contributors address the desire for change through three central frames: how feminist art has significantly contributed to the complex understanding of gender as it intersects with sexuality and race; the necessary critique of patriarchy and institutions as they relate to colonization within the Canadian nation-state and the ways in which contemporary critiques are formed and expressed Heavily illustrated with representative works *Desire Change* raises both the stakes and the concerns of contemporary feminist art with an understanding that feminism is always and necessarily plural **Africa's Past, Our**

Future Kathleen R. Smythe, 2015-07-06 An impressive synthesis of current literature in African history making it understandable and relevant Jan Bender Shetler, author of *Imagining Serengeti: A History of Landscape Memory in Tanzania from Earliest Times to the Present* *Africa's Past, Our Future* engages the history of the African continent through the perspective of global issues such as political instability, economic development and climate change Since the past may offer alternative models for thinking about our collective future, this book promotes an appreciation for African social, economic and political systems that have endured over the long term and that offer different ways of thinking about a sustainable future Introducing readers to the wide variety of sources from which African history is constructed, the book's ten chapters cover human evolution, the domestication of plants and animals, climate change, social organization, the slave trade and colonization, development and contemporary economics and politics Smythe not only provides an excellent survey of the latest research on Africa's past, she also presents a concise and clear argument as to why this history is relevant today *African Studies Review* Recommended Choice Grapples with the narratives and facts and where they fit in global perspective but why this is all salient and critically meaningful to our lives today in terms of lessons we can learn and ideas we can borrow This is a unique approach not yet available on the market Catherine Cymone Fourshey, Susquehanna University

Book Lust to Go Nancy Pearl, 2010-06-01 Adventure is just a book away as bestselling author Nancy Pearl returns with recommended reading for more than 120 destinations both worldly and imagined around the globe From Las Vegas to the Land of Oz, Naples to Nigeria, Philadelphia to Provence, Nancy Pearl guides readers to the very best fiction and nonfiction to

read about each destination Even within one country she traverses decades to suggest titles that effortlessly capture the different eras that make up a region s unique history This enthusiastic literary globetrotting guide includes stops in Korea Sweden Afghanistan Albania Parma Patagonia Texas and Timbuktu Book Lust To Go connects the best fiction and nonfiction to particular destinations whether your bags are packed or your armchair is calling From fiction to memoir poetry to history Nancy Pearl s Book Lust to Go takes the reader on a globetrotting adventure no passport required Encountering Gorillas James L. Newman,2013-07-05 Gorillas the largest of the apes inhabiting our planet have been a source of fear awe and inspiration to humans In this book James L Newman brings a lifetime of study of Africa to his compelling story of the rich and varied interaction between gorillas and humans since earliest contact He illuminates the complex relationship over time through the interlinked themes of discovery exploitation understanding and continuing survival Tragically the number of free living gorillas facing habitat loss disease and poaching has declined dramatically over the course of the past century and the future of the few that remain is highly uncertain At the same time those in zoos and sanctuaries now lead much more secure lives than they did earlier Newman follows this transition highlighting the roles played by key individuals both humans and gorillas Among the former have been adventurers opportunists writers and scientists The latter include real gorillas such as Gargantua and Koko and fictional ones notably King Kong and Mighty Joe Young This thoughtful and engaging book helps us understand how our image of gorillas has been both distorted and clarified through culture and science for centuries and how we now control the destiny of these magnificent great apes **The Ape that Understood the Universe** Steve Stewart-Williams,2019-11-21 The Ape that Understood the Universe is the story of the strangest animal in the world the human animal It opens with a question How would an alien scientist view our species What would it make of our sex differences our sexual behavior our altruistic tendencies and our culture The book tackles these issues by drawing on two major schools of thought evolutionary psychology and cultural evolutionary theory The guiding assumption is that humans are animals and that like all animals we evolved to pass on our genes At some point however we also evolved the capacity for culture and from that moment culture began evolving in its own right This transformed us from a mere ape into an ape capable of reshaping the planet travelling to other worlds and understanding the vast universe of which we re but a tiny fleeting fragment Featuring a new foreword by Michael Shermer Storytelling Apes Mary Sanders Pollock,2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is

encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs monkeys and apes In *Storytelling Apes* Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in *Storytelling Apes* free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

Routledge Handbook of Human-Animal Studies

Garry Marvin, Susan McHugh, 2014-04-16 Human animal studies is an academic field that has grown exponentially over the past decade It explores the whys hows and whats of human animal relations why animals are represented and configured in different ways in human cultures and societies around the world how they are imagined experienced and given significance what these relationships might signify about being human and what about these relationships might be improved for the sake of the individuals as well as the communities concerned The Routledge Handbook of Human Animal Studies presents a collection of original essays from artists and scholars who have established themselves internationally on the basis of specific and significant new contributions to human animal studies This international interdisciplinary handbook will be of interest to students and scholars of human animal studies sociology anthropology biology environmental studies geography cultural studies history philosophy media studies gender studies literature psychology ethology and visual studies an other

Sharon Patricia Holland, 2023-07-03 In *an other* Sharon Patricia Holland offers a new theorization of the human animal divide by shifting focus from distinction toward relation in ways that acknowledge that humans are also animals Holland centers ethical commitments over ontological concerns to spotlight those moments when Black people ethically relate with animals Drawing on writers and thinkers ranging from Hortense Spillers Sara Ahmed Toni Morrison and C E Morgan to Jane Bennett Jacques Derrida and Donna Haraway Holland decenters the human in Black feminist thought to interrogate blackness insurgence flesh and femaleness She examines MOVE s incarnation as an animal liberation group uses sovereignty in Morrison s *A Mercy* to understand blackness indigeneity and the animal analyzes Charles Burnett s films as commentaries on the place of animals in Black life and shows how equestrian novels address Black and animal life in ways that rehearse the practices of the slavocracy By focusing on doing rather than being Holland demonstrates that Black life is not solely likened to animal life it is relational and world forming with animal lives

The Evolution of Gerald Durrell

Mary Sanders Pollock, 2024-06-27 In *The Evolution of Gerald Durrell A Naturalist s Critical Biography* Mary Sanders Pollock revisits the life and work of Gerald Durrell one of the most significant environmentalist figures of the 20th century This new biography

tracks Durrell's evolution from a free range childhood on Corfu through his time in Africa South America and the islands of the Pacific and Indian Oceans Durrell's early work is described in his numerous travel narratives but his conservation activities culminated in the stationary ark a conservation zoo on the Isle of Jersey which still plays an important role in global wildlife conservation efforts This biography situates Durrell's writing collecting and conservation practices within the frameworks of animal studies conservation biology and postcolonial history Familiarizing readers with the broad range of his cultural impact from The Corfu Trilogy to his BBC television specials Pollock shows how Durrell's approach offers models for how life on earth is to thrive and survive scientists must make greater efforts to touch hearts and minds and cultural workers must communicate more about science and the perilous existence of other species *Sex and Gender* Hilary M.

Lips,2020-04-10 Are sex and gender really two different things How malleable is gender identity Do both gender and sex have to be conceptualized as binaries as having two distinct but complementary categories Should we emphasize gender differences or is that the wrong question When should we call a gender difference small Are women really nonaggressive or does that label stem from stereotyping How does subtle or modern sexism work on its targets Scholarship on these and other gender related questions has exploded in recent years Hilary Lips synthesizes that research for students in an accessible and readable way Concepts on sex and gender are presented with the social context in which they were developed As in previous editions Lips takes a multicultural approach discussing the gender experiences of people from a wide range of races cultures socioeconomic statuses and gender and sexual identities She emphasizes empirical research but takes a critical approach to that research **Beasts** Jeffrey Moussaieff Masson,2014-03-13 Orcas or killer whales are one of the planet's supreme

predators Alongside humans they have the most complex brains to be found in nature But while one of these two species has killed 200 million members of its own kind in the twentieth century alone the other has killed none This is where Jeffrey Masson's fascinating new book begins there is something different about humans Masson has shown us that animals can teach us much about our own emotions about love dogs contentment cats and grief elephants But they have much to teach us about the negative emotions such as anger and aggression as well and in unexpected ways In *Beasts* he demonstrates that the violence we perceive in the wild is mostly a matter of projection We link the basest human behaviour to animals to beasts and claim the high ground for our species We are least human we think when we succumb to our primitive animal instincts In fact nothing could be further from the truth Animal predators kill to survive but there is nothing in the annals of animal aggression remotely equivalent to the violence mankind has inflicted upon itself Humans and humans in our modern industrialised world in particular are the most violent species in existence We lack what all other animals have a check on aggression that serves the species rather than destroys it And it is here that animals have something vitally important to teach us about ourselves **The Emotional Lives of Animals & Children** William Crain,2014-10-17 In 2008 Bill Crain a

professor of psychology at The City College of New York and his wife Ellen a pediatrician opened Safe Haven Farm Sanctuary

in Poughquag New York The sanctuary provides a permanent home to over 70 animals rescued from slaughter and abusive situations including goats sheep chickens turkeys ducks partridges and a mini horse It also has afforded Bill a tremendous opportunity to observe animals in all manner of emotional states and how their behavior casts light on the emotions of human children In *The Emotional Lives of Animals and Children* Crain honors the work of John Bowlby a psychoanalyst who began his major writings in the 1950s Bowlby drew on biologists observations of animals to provide a compelling account of children s attachment to their caretakers Today the study of attachment is extremely popular Crain writes but one would hardly know that the initial inspiration came from observations of non human animals Moreover there has been little effort to extend Bowlby s work to see how the study of animals illuminates other aspects of child development Crain suggests that the reluctance to follow Bowlby s lead reflects the Western worldview that considers humans as different from and superior to other species To think about children in the same category as animals seems to demean children But Crain discovered that the farm animals emotional behaviors can help us understand those of human children *The Emotional Lives of Animals and Children* is divided into two parts Part one discusses six emotional behaviors that are shared by animals and children fear play freedom care spirituality and resilience Part two addresses the broader social theme of our Western culture s disparagement of animals Initially children do not set themselves apart from nature but experience it with an instinctive empathy However they are eventually taught by our society to detach themselves and to devalue animals Crain writes As people attempt to move beyond society s dominant views of animals they can also draw on a neglected idea that goes back to ancient times This is the view that there is a special wisdom in the child s ways of knowing This view is found in the ancient Chinese Taoist statement wise souls are children About Safe Haven Farm Sanctuary Safe Haven Farm Sanctuary is located in Poughquag New York about an hour and a half outside of New York City Its focus is on the rescue of abused and neglected farm animals In doing so it hopes to raise awareness of the plight of animals raised for food and the benefits of a vegan diet for animals human health and the environment Wherever possible the sanctuary tries to implement environmentally sound practices such as solar heating and the use of reclaimed wood

Tuttle 1986 and the judgment of fellow forensic anthropologists who supported her testimonials We hope this book might lead to a better understanding of how science can serve our courts by using novel and well established results of scientific research less adversarially with a view to achieve justice for all parties affected by crimes Particularly claims of new forensic methods should be tested thoroughly by peer review outside the courtroom before employment to decide matters of life and death Dr Robbins s decade of quackery is a prime example of how justice might be better served by early thorough scrutiny of a claimant s novel methods and general scientific expertise In addition to relevant literature my main source is correspondence among Drs Robbins Mary Leakey and Michael Day court records of barristers and myself from copies of correspondence in my files dating back to 1980 and Anthropology Archives at the Smithsonian Institution and detailed reports prepared by Dr Robbins and R Tuttle concerning a criminal case in Winnipeg Canada Although I did not set out to write the book as a memoir it quickly became thus as I recalled the experiences that shaped me as a paleoanthropologist Previously my research was on functional morphology history of anthropology and evolutionary biology in the USA and Europe **L'animal est-il un philosophe** Yves Christen,2013 **Human Evolution and Male Aggression** ,
